AI Use in Social Sciences
Demircioğlu, Aytekin, 2025-06-18
Artificial intelligence AI based technologies are significantly impacting various social science disciplines. With the large data sets that are analyzed, technologies such as machine learning (ML), natural language processing (NLP), and neural networks are particularly useful in disciplines such as sociology, psychology, political science, anthropology, and economics. Thus, social science education and research benefit by the ability of AI to effectively analyze data sets, predict, and increase interactivity. However, ethical concerns regarding privacy and algorithm bias cause some to be resistant to adopting the use of AI in social science fields. Thus, it is crucial to consider the ethical consequences while exploring the multifaceted impact of AI on education, research, and social sciences.

AI Use in Social Sciences explores the opportunities and challenges AI provides to the field of social sciences. It presents practical applications of AI and the societal implications they have. Covering topics such as philosophy, teaching, economic policy, and unified theory of acceptance and use of technology, UTAUT, this book is an excellent resource for social scientists, teachers, ethicists, policymakers, researchers, professionals, scholars, academicians, and more.

Smart Cultural Immersion Innovations for Foreign Language Teaching
Çelik, Ferdi, Duran, Volkan, 2025-12-16
In a globalized world, critical communication across cultures requires that language education evolve to meet this demand. Smart cultural immersion transforms traditional foreign language teaching. These technologies bridge the gap between textbook learning and real world cultural immersion, allowing learners to experience linguistic authenticity without leaving their country. By integrating culture with language instruction in immersive ways, these innovations enhance linguistic proficiency and intercultural competence, preparing students for diverse global environments.

Smart Cultural Immersion Innovations for Foreign Language Teaching examines the use of smart technologies, including AI adaptive systems and immersive tools, in modern language instruction. It explores current innovations, theoretical perspectives, and practical applications, with a focus on how smart education can enhance language acquisition, engagement, and learner autonomy. This book covers topics such as classroom management, inclusive education, and educational technologies, and is a useful resource for language educators, sociologists, academicians, researchers, and scientists.

It focuses both on the potential and effects of GenAI and on its limitations risks and challenges. Particular emphasis is placed on the impact that GenAI has on pedagogy and knowledge assessment across a range of educational fields and disciplines as well as on teacher preparation development productivity and workload. While artificial intelligence has gradually penetrated the field of education over the last 30 years the emergence of GenAI which we are now witnessing is changing the game. From a perspective that transcends national specificities the analyses address all levels of education as well as the development of education policies. In terms of epistemology and methodology the work draws on a variety of research frameworks theoretical conceptual empirical and methodologies including qualitative quantitative and mixed methods research. This work offers a series of suggestions and recommendations as well as avenues for future research in a range of areas including AI GenAI literacy teacher preparation and development curriculum updating pedagogy knowledge assessment teacher effectiveness learner development education policy and ethics. It also warns of the risks posed by GenAI particularly in terms of deskilling breaches of data privacy and research integrity bias social justice ecological sustainability and loss of meaning of the teaching profession [Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias](#) Garcia, Manuel B., Rosak-Szyrocka, Joanna, Bozkurt, Aras, 2025-05-09 The integration of artificial intelligence AI in education rapidly transforms the teaching and learning process. Recent systematic reviews have shown an increase in research studying the opportunities and challenges associated with AI in education. This trend reflects a growing recognition of its potential to revolutionize educational practices. However there are also growing concerns and issues with skill obsolescence leading to job displacement algorithm bias and misuse of AI for academic dishonesty. As educational institutions increasingly rely on AI to enhance academic outcomes proactively addressing these challenges ensures the ethical and responsible use of AI in education. [Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias](#) offers a targeted exploration of the critical challenges and concerns that arise as AI becomes more embedded in educational systems. Focusing on emerging issues it addresses the gaps in current research and practice shedding light on the ethical practical and pedagogical dilemmas that educators students and institutions face. ES development as a software engineering endeavor and emphasizes that as such it should be subject to much the same discipline as conventional automated information system software. The guide is meant to be used in conjunction with accepted software development methods and standards such as Department of Defense DOD Standards 2167A and 7935 1 DOD Directive 7920 1 DOD Instruction 7920 2 and the OSD Major Automated System Review Council MAISRC Guidelines for Program Managers. This document presents a step by step guideline that addresses the managerial and technical risks of each phase in the software development life cycle of systems that contain ES components.
