**Returning Learning** Simone M. Blom, 2024-12-30 *Returning Learning* explores early school years teachers' perceptions of nature and how this informs their pedagogy through a posthuman theoretical framework. The theoretical framework is purposefully designed to disrupt dichotomies and reject abuse to marginalised others. In doing so, this book offers a reconceptualisation of learning in environmental education and education more broadly. The posthuman theoretical framework is a transdisciplinary offering informed by material discursive practices, affective atmospheres, and childhood nature. The theoretical framework and transqualitative methodology support diffractive ethnographic methods where data are generated through an iterative and entangled data collection and data analysis process. This process is presented as a series of diffractive data entanglements that explore teachers' perceptions of nature, their pedagogical practices, and the implications of these data through a posthuman framing. These non-conventional approaches to undertaking research are the foundation for this book that listens to teachers' voices by conducting research with teachers rather than to teachers. Through a deep exploration into the intricacies of everyday classroom practices and happenings, this book privileges the voices of the teachers and the nonhuman, thus the response ability of teachers to their students and the planet is re-turned. It will be of interest to researchers who are interested in creative and innovative theories and methodologies as well as those studying environmental education and other pedagogical studies as part of their courses.
