Remote Desktop Protocol RDP is a proprietary protocol developed by Microsoft which provides a user with a graphical interface to connect to another computer over a network connection. The user employs RDP client software for this purpose while the other computer must run RDP server software. RDP refers to Remote Desktop protocol which connects your remotely connected computers or system over a RDP connected network. RDP gives a graphical interface to a client to be able to associate with another PC system or network. RDP servers are built on Windows OS but can be enabled to other OS as well. The major benefit of a remote desktop connection is being able to connect to your data from anywhere in the world. Your data is in one place that is easy to see and you no longer have to have software installed on your own computer. In Simple term RDP is a short form of Remote Desktop Protocol. RDP specifies for home windows servers it works as an icon to get in touch with an additional computer system usually it is utilized for attaching to a server organized in a data center to carry out jobs that typically do not need much user interaction and runs 24/7. Several of the extra usual uses of RDP servers are running bots, SEO devices, bitcoin mining, on-line video clip streaming, running forex trading software, and so on. Most RDP servers providers that provide free services during trial period will request debit/credit card information which is risky for us as they can claim any payment from the card. So that encouraged me to search for RDP services providers that can provide services during free trial period without requesting credit/debit card information. This report will investigate the possible ways to get free RDP server account or RDP server account at lowest cost. The report will consist from the following parts: 1.
