Moving Media Storage Technologies

Moving Media Storage Technologies Karl Paulsen, 2012-12-11 Complex media storage computer systems are employed by broadcasters digital cinemas digital signage and other business and entertainment venues to capture store and retrieve moving media content on systems that will preserve the original integrity of the content over time and technological transition. This book provides detailed information related to the concepts, applications, implementation and interfaces of video file servers, intelligent storage systems, media asset management services, content distribution networks and mission critical platforms. A tutorial and case example approach is taken to facilitate a thorough understanding of the technologies using numerous illustrations, tables and examples. The text and appendices are designed to provide easy to access valuable reference and historical information. A focus on the media serving concepts and principles employed at the enterprise level. Practical and technological summaries of the applications and linkages between media asset management and storage technologies for studio television and media production workflows. Illustrations, standards, tables and practical summaries serve as handy reference tools.

National Association of Broadcasters Engineering Handbook Garrison Cavell, 2017-07-28 The NAB Engineering Handbook is the definitive resource for broadcast engineers. It provides in depth information about each aspect of the broadcast chain from audio and video contribution through an entire broadcast facility all the way to the antenna. New topics include Ultra High Definition Television, Internet Radio Interfacing and Streaming, ATSC 3.0 Digital Audio Compression Techniques, Digital Television Audio Loudness Management and Video Format and Standards Conversion. Important updates have been made to incumbent topics such as AM Shortwave, FM and Television Transmitting Systems, Studio Lighting, Cameras and Principles of Acoustics. The big picture, comprehensive nature of the NAB Engineering Handbook will appeal to all broadcast engineers, everyone from broadcast chief engineers who need expanded knowledge of all the specialized areas they encounter in the field to technologists in specialized fields like IT and RF who are interested in learning about unfamiliar topics. Chapters are written to be accessible and easy to understand by all levels of engineers and technicians. A wide range of related topics that engineers and technical managers need to understand are covered including broadcast documentation, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management and engineering management.
