NVQ LEVEL 3 in Occupational Work Supervision (Construction)

Unit No	06	Allocating and Monitoring the Use of Plant, Machinery or Equipment in the Workplace
----------------	-----------	--

Unit ref. T/503/2740 ***** OPTIONAL UNIT ***** (QCF Level 3 – Credit Value : 9)

1.2	Explain how to check the following types of plant, machinery or equipment in the workplace for condition and allocate to suitable operations: – static and mobile – standard/non-standard – electro-mechanical and electronic – hand tools – consumables – health and safety equipment.
	For static and mobile plant there have daily checks carried out by the operator of the plant and equipment and ticked off on a check sheet or a tag system. Anything highlighted on that item of equipment is then taken out of service and repaired. All static and mobile equipment is suitably planned and picked for the correct usage for example JCB or digger to dig a hole. All hand tools are picked in accordance with company procedures and met to a standard that all users will carry out a pre-use inspection and use correctly by the user and not modified in anyway. Supervisor does random checks of hand tools to check this is happening. All equipment is pre-use checked by the user or operator for any defects, if defects are found they are directly reported to the supervisor and the equipment or plant not used until further notice. Some equipment requires annual service to maintain the equipment and some equipment and plant requires a thorough inspection our company goes above the regulation and covers everything every six months and not yearly like the regulation states.
2.4	Explain how to identify what health and safety risks there are, in relation to: – operators – other personnel in the workplace – members of the public – workplace visitors – owners of adjoining property environment
	All health and safety risks are risked assessed before any operation. We look at operators and risk assess the risks like training and experience for suitability for operation of that machine/plant or equipment. We also look at working times so they are no working excessive hours in charge of a plant etc. When operation of plant we need to keep other personnel safe by keeping them away from the operation and segregating them at all times for movability around site and keeping them safe. Members of the public are very runnable to the hazards and risk involved in the use of plant, equipment and machinery and we identify the risks in evolved like segregation from the operations ongoing having a traffic management plan and barriers and signs around operation to warn of the hazards. All visitors will need to complete an induction and be accompanied by a supervisor at all times when on site even after the induction because it is only a visitors one and not the full one. When we have adjoining owners we need consult them on our traffic management plan and discuss the environmental impact on them from all the construction works being carried out and try to lower the impact on them.
2.5	Explain the methods used to assess any health and safety risks for the working being carried out.
