Public Works, 1971 **Counterfactualism in the Fine Arts** Elke Reinhuber, 2022-10-14 Counterfactual thinking has become an established method to evaluate decisions in a range of disciplines including history psychology and literature Elke Reinhuber argues it also has valuable applications in the fine arts and popular media A fascination with the path not taken is a logical consequence of a world saturated with choices Art which provokes and explores these tendencies can help to recognise and contextualise the impulse to avoid or endlessly revisit individual or collective decisions Reinhuber describes the term in broad strokes through the disciplines to show how counterfactualism finds shape in contemporary art forms especially in photography film and immersive and interactive media art such as 360 content virtual reality and augmented reality She analyses the different stages of counterfactuals with examples where artists experience counterfactual thoughts in the process of art production explore these thoughts in their artwork and where the artwork itself evokes counterfactual thoughts in the audience A fascinating exploration for scholars and students of art media and the humanities and anybody else with an interest in choices the art of decisionmaking and counterfactualism

Taking Stock Sean B. Franzel, Ilinca Iurascu, Petra S. McGillen, 2024-10-21 The volume examines the proliferation of inventorying models and practices as cultural techniques of knowledge organization and production during the long nineteenth century While inventories are still broadly treated as raw data and unprocessed source materials the book shows how they function as complex media formats intersecting and interfering with other material techniques to produce store distribute organize and process cultural information How do inventories work against and in dialogue with other media of collection storage and retrieval such as catalogs indexes bibliographies and archives what new media configurations do techniques of inventorying enable and how in turn are such techniques shaped by the media channels and formats they employ what is at stake in the critical effort of taking stock whether as commercial bureaucratic literary historiographical or scientific operations finally what do such operations tell us specifically about the production and circulation of knowledge in the German nineteenth century

Negative Media Ella Klik, 2026-02-17 In a world inundated by an endless proliferation of texts images and data the tension between the human desire to preserve and the economic incentive to retain collides with the finite nature of storage and its attendant costs The impulse to keep everything inevitably confronts material constraints compelling a reckoning with erasure as a necessity that enables ongoing creation As this book

reveals such considerations are far from unique to the digital age Spanning early analog sound recordings to contemporary debates about digital cloud solutions *Negative Media* proposes that acts of removal cutting deletion and effacement shape the invention and use of popular storage technologies from the 19th century to the present Ella Klik invites readers to reconsider how recording mechanisms operate arguing that negation is not a design flaw but a process intentionally woven into the very fabric of these systems Through engaging stories including the accidental deletion of the Apollo 11 moon landing tapes the book traces a genealogy of undoing that reframes our understanding of media s lifecycle from production to managing scarcity and abundance Rather than privileging long term retention as the primary framework for analysis Klik navigates through media histories and theories to foreground reuse at a moment where prevailing narratives insist perhaps too boldly that nothing can ever truly disappear from the internet
