## **Multimedia Cartography Volume 1 Multimedia Cartography Volume 1:**

**Multimedia Cartography** William Cartwright, Michael P Peterson, Georg Gartner, 2007-02-13 Multimedia Cartography provides a contemporary overview of the issues related to multimedia cartography and the design and production elements that are unique to this area of mapping The book has been written for professional cartographers interested in moving into multimedia mapping for cartographers already involved in producing multimedia titles who wish to discover the approaches that other practitioners in multimedia cartography have taken and for students and academics in the mapping sciences and related geographical fields wishing to update their knowledge about current issues related to cartographic design and production It provides a new approach to cartography one based on the exploitation of the many rich media components and avant garde approach that multimedia offers

**Cybercartography** D.R. Fraser Taylor, Tracey Lauriault, 2006-01-12 For generations the map has been central to how societies function all over the world Cybercartography is a new paradigm for maps and mapping in the information era Defined as the organization presentation analysis and communication of spatially referenced information on a wide variety of topics of interest to society cybercartography is presented in an interactive dynamic multisensory format with the use of multimedia and multimodal interfaces Cybercartography Theory and Practice examines the major elements of cybercartography and emphasizes the importance of interaction between theory and practice in developing a paradigm which moves beyond the concept of Geographic Information Systems and Geographical Information Science It argues for the centrality of the map as part of an integrated information communication and analytical package This volume is a result of a multidisciplinary team effort and has benefited from the input of partners from government industry and other organizations The international team reports on major original cybercartographic research and practice from a variety of disciplinary perspectives including the humanities social sciences including human factors psychology cybernetics English literature cultural mediation cartography and geography This new synthesis has intrinsic value for industries the general public and the relationships between mapping and the development of user centered multimedia interfaces Discusses the centrality of the map and its importance in the information era Provides an interdisciplinary approach with contributions from psychology music and language and literature Describes qualitative and quantitative aspects of cybercartography and the importance of societal context in the interaction between theory and practice Contains an interactive CD Rom containing color images links to websites plus other important information to capture the dynamic and interactive elements of cybercartography

**Online Maps with APIs and WebServices** Michael P. Peterson, 2012-03-30 The Internet has become the major form of map delivery The current presentation of maps is based on the use of online services This session examines developments related to online methods of map delivery particularly Application Programmer Interfaces APIs and MapServices in general including Google Maps API and similar services Map mashups have had a major impact on how spatial information is presented The advantage of using a major online mapping

site is that the maps represent a common and recognizable representation of the world Overlaying features on top of these maps provides a frame of reference for the map user A particular advantage for thematic mapping is the ability to spatially reference thematic data

Geographic Hypermedia Emmanuel Stefanakis, Michael P Peterson, Costas Armenakis, Vasilis Delis, 2007-01-04 This book introduces a new paradigm Geographic Hypermedia which emerges from the convergence of Geographic Information Science and permedia technology Both GI Science and hypermedia have been rapidly evolving fields The initial idea of Geographic Hypermedia was born in 2004 when the editors had been invited to organize a workshop in conjunction with the Hypertext conference organized annually by the Special Interest Group of the Association for Computing Machinery The purpose of the workshop was to examine how hypermedia concepts and tools may be applied in geographical domains The workshop was eventually held in conjunction with the Maps and the Internet Commission of the International Cartographic Association at the annual meeting of the Association of American Geographers in Denver Colorado in April 2005 The Denver workshop was a successful event bringing together multidisciplinary researchers and professionals in the area of Geographic permedia Researchers from four continents and well recognized institutions presented their work and exchanged opinions about the new paradigm its content and distinct characteristics from other paradigms Extended versions of the papers presented at the workshop along with some invited chapters from experts in the field led to the compendium of the twenty five chapters in this book volume Geographic Hypermedia is not yet a mature paradigm but we aspire to provide the scientific community with a contemporary view of Geographic Hypermedia present an overview of its progress and current status while also promoting further discussion and research
