Why Should I Believe? Why Should You Believe? Terry Read,2014-10-10 This is one mans journey to discover the truth about the Bible Terry Read grew up in a Christian household and went to church But Terry did not live in a bubble Terry watched documentaries read magazines read encyclopedias and went to public school Terry knew that what he was learning about science from all of these other sources did not mesh with the Bible Terry tried to make the two world views fit together somehow But Terry discovered another option that he had never been taughtthat a person could believe the Bible as it reads The Bible does not contradict good science Terry studied this He learned that the biblical world view is actually the only world view that is consistent with even doing science Terrys discovery was such great news to him that he wanted to share it He knew that other people would be happy to hear this message He knew that whether or not they admitted it other people were doing mental gymnastics as he had done to make the Bible fit the science Terry could see the devastation brought on society because people do not believe the Bible But when Terry tried to share his discovery he became frustrated The reason Terry had so much consternation was the unexpected source of the frustrationchurch leadership Church leadership was actually afraid to share this message that people really can believe the Bible This book documents Terrys struggles and tells what you can do

The Imagined Conflict Sverre Holm,2025-11-21 Of course there is a conflict between science and God many say and they do not even bother to ask for justification This myth based view is dominant in our culture Sverre

Holm regularly encounters attitudes that reflect such a perception which is based more on opinion than on fact This has inspired him to embark on the exciting task of elucidating how classical Christian faith with a little effort can go together with science The result is an educational and engaging book for anyone interested in science its history and philosophy Science is strangely vague when faced with the question of human consciousness and calls the origin of its most prominent characteristic the ability to speak a mystery Nevertheless there is no lack of certainty about how evolution can explain everything about human nature Are we approaching the limits of what science can explain here
