Principles and Practice of Constraint Programming, 2003 *Proof And Computation Ii: From Proof Theory And Univalent Mathematics To Program Extraction And Verification* Klaus Mainzer, Helmut Schwichtenberg, Peter Michael Schuster, 2021-07-27

This book is for graduate students and researchers introducing modern foundational research in mathematics, computer science and philosophy from an interdisciplinary point of view. Its scope includes proof theory, constructive mathematics and type theory, univalent mathematics and point free approaches to topology, extraction of certified programs from proofs, automated proofs in the automotive industry as well as the philosophical and historical background of proof theory. By filling the gap between undergraduate level textbooks and advanced research papers, the book gives a scholarly account of recent developments and emerging branches of the aforementioned fields.

[Web and Network Data Science](#) Thomas W. Miller, 2014-12-19

Master modern web and network data modeling both theory and applications. In Web and Network Data Science, a top faculty member of Northwestern University's prestigious analytics program presents the first fully integrated treatment of both the business and academic elements of web and network modeling for predictive analytics. Some books in this field focus either entirely on business issues e.g. Google Analytics and SEO; others are strictly academic, covering topics such as sociology, complexity theory, ecology, applied physics and economics. This text gives today's managers and students what they really need: integrated coverage of concepts, principles and theory in the context of real world applications. Building on his pioneering Web Analytics course at Northwestern University, Thomas W. Miller covers usability testing, Web site performance, usage analysis, social media platforms, search engine optimization, SEO and many other topics. He balances this practical coverage with accessible and up to date introductions to both social network analysis and network science, demonstrating how these disciplines can be used to solve real business problems.
