EFFICIENT, SCALABLE, CONNECTED

General

The NOTIFIER INSPIRE™ Series Fire Alarm Control Panels (FACPs) bring the latest technology to life safety. Fire, emergency detection and evacuation are extremely critical to life safety. With the N16e and N160x panels, NOTIFIER INSPIRE Series offers a scalable platform to meet any size application.

NOTIFIER INSPIRE Series FACPs feature an intuitive 10" color touchscreen display. This display is color-coded with system and status information. Users are presented with vital information that is easy to read and navigate.

Offered in a standard pre-configured enclosure, the N16e comes with one Signalling Line Module (SLM) to support 310 intelligent addressable devices and a power supply (PMB) to support four NACs and four auxiliary outputs. Panels can be configured with just a few devices for small building applications or expanded via two open module slots. Add up to two additional Signalling Line Modules (SLM-310), expanding capacity to 954 intelligent addressable devices on a total of three Signalling Line Circuit (SLC) loops, or interwork with many devices to protect a large campus or a high-rise office block. Simply add additional peripheral equipment to suit the application.

The N160x features a modular design. Order CPU-N160LND, CPU-N16LD, or CPU-16-RTO to meet project requirements. Panels can be configured for stand-alone or network systems. The N160x can support up to 10 SLM-310 modules. For a capacity of up to 3,180 intelligent addressable devices. Five enclosure sizes are available to support additional peripheral equipment. A host of other options are available, including single or multichannel integrated voice, and fire-fighter's telephone.

The NOTIFIER INSPIRE Series integrates with the Connected Life Safety Services (CLSS) platform through the CLSS Gateway, providing connectivity to central station, cloud, and mobile applications. (See [HKNW-G2004](#)). This cloud-based functionality provides reliable protection and remote programming, testing, and monitoring of the system, along with reduced manual data entry and reporting.
