**Number the Stars**, 1994 Teaching units to accompany the study of the novel *Number the Stars* by Lois Lowry **Electronic String Art** Stephen Erfle, 2024-02-20 String art is a well-known and popular activity that uses string, a board, and nails to produce artistic images although there are variations that use different modalities This activity is beloved

because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds The downside of this highly tactile activity is that it is quite time consuming and rigid By contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously Electronic String Art Rhythmic Mathematics invites readers to use the author's digital resources available on the ESA website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change Readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections Features Readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections Sections are lessons that were created so that they could be digested in a single sitting These sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting An open ended inherently flexible teaching resource for elementary middle and high school level mathematics The most mathematically challenging sections or portions of a section are designated MA and may not be accessible to elementary and middle school readers Will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics Includes exercises solutions and many online digital resources These QR codes take you to these digital resources One takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in Section 25 5 The other takes you to the ESA web page with additional links to a variety of resources

**Teaching Elementary Social Studies** James A. DuPless, 2008 Written for the elementary social studies methods course this interactive program combines features of a textbook and a workbook with thorough integration between the print text and a dynamic web site Increasingly majors in elementary education if not the population at large are more attuned to reading interactive material with relatively brief narrative bulleted items text boxes and targeted messages like web pages rather than traditional denser text To accommodate these preferences the layout of the print text features a larger than usual font an 8 x 11 trim size and spiral binding and the content includes an abundance of bulleted lists shaded text boxes and contemporary graphics The program's interactive approach and flexibility allow the professor to model the kinds of teaching principles and practices that students will want to use in their own elementary school classrooms These principles and practices are integrated throughout the text and include a focus on active learning strategies application of constructivist principles focus on Big Ideas and thinking skills use of the Internet and modeling of Best Practices and Performance based assessments based on INTASC and NCATE standard Thus the book will serve as a springboard for classroom activities web site explorations and or instructor led activities
