Networking of personal computers and workstations is becoming commonplace in academic and industrial environments A cluster of workstations provides engineers with a familiar cost effective environment for high performance computing However workstations often have no dedicated link and communicate slowly on a local area network LAN such as the Ethernet Thus to effectively harness the parallel processing or distributed computing capabilities of workstations new algorithms need to be developed with a higher computation to communication ratio Distributed Computer Aided Engineering presents distributed algorithms for three fundamental areas finite element analysis design optimization and visualization providing a new direction in high performance structural engineering computing *Monthly Catalog of United States Government Publications* United States.
