**Beyond Gifted Education** Scott J. Peters, Michael S. Matthews, Matthew T. McBee, D. Betsy McCoach, 2021-09-03  
Seeking a more comprehensive vision for gifted education this book offers a modern vision of programs and services for gifted and talented students. *Beyond Gifted Education: Designing and Implementing Advanced Academic Programs* provides the first comprehensive look at designing and implementing advanced academic student programs. Written by four leading experts in the field, *Beyond Gifted Education* reviews the current range of traditional gifted education practices and policies. Then the book offers the concerned gifted program coordinator or school administrator a more expansive approach to educating gifted learners. The authors lead readers through the process of identifying needs, responding with programming, and then finding students who are well suited for and would benefit from advanced academic programming. Detailed examples walk the reader through real world scenarios and programs common to the gifted coordinator on topics such as cluster grouping, acceleration, and increasing diversity. Throughout the book, connections are made to Common Core State Standards Response to Intervention and a wealth of outside research in order to support ideas.

*Catholics in America* Lisa A. Keister, Professor of Sociology and Public Policy Lisa A. Keister, 2024  
More than 20 percent of Americans are Catholic and overall membership in the Catholic Church has remained relatively steady even as increasing numbers of people claim no religious affiliation. *Catholics in America* provides a contemporary social portrait of this large, increasingly influential group that clarifies who Catholics are and what they really believe. The book offers extensive empirical evidence to uncover the real story of today's Catholics, including their family behaviors, work and economic status, and beliefs. This book will be an important guide for anyone wanting to understand the personal and religious foundations of today's Catholics.

**Normative Data** Northwest Evaluation Association, 2017  
Having the right data is a key component of individualizing instruction for each child. The Northwest Evaluation Association (NWEA) has the ability to measure a student's achievement and academic growth independent of grade across time. From the insight provided with Measures of Academic Progress (MAP) and its reports, educators can compare class or grade level performance to students from a wide variety of schools across the country. Status norms provide a starting point for educators to review data and help them gain an understanding of each child's current academic level where they need focused instruction and the extent of their progress. The 2011 NWEA RIT Scale Norms Study provides growth and status norms for all five RIT scales: Reading, Language Usage, Mathematics, General Science, and Science Concepts and Processes.

*NWEA FAQ* Northwest Evaluation Association, 2015  
Northwest Evaluation Association (NWEA) conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making. It is an important part of our commitment to our partners. The most recent NWEA norms were released in July 2015. Just as we expect student performance to change with time, norms of student performance will change correspondingly. For 2015, several factors may have influenced

how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below
