**Search-User Interface Design** Max Wilson, 2022-05-31 Search User Interfaces SUIs represent the gateway between people who have a task to complete and the repositories of information and data stored around the world Not surprisingly therefore there are many communities who have a vested interest in the way SUIs are designed There are people who study how humans search for information and people who study how humans use computers There are people who study good user interface design and people who design aesthetically pleasing user interfaces There are also people who curate and manage valuable information resources and people who design effective algorithms to retrieve results from them While it would be easy for one community to reject another for their limited ability to design a good SUI the truth is that they all can and they all have made valuable

contributions Fundamentally therefore we must accept that designing a great SUI means leveraging the knowledge and skills from all of these communities The aim of this book is to at least acknowledge if not integrate all of these perspectives to bring the reader into a multidisciplinary mindset for how we should think about SUI design Further this book aims to provide the reader with a framework for thinking about how different innovations each contribute to the overall design of a SUI With this framework and a multidisciplinary perspective in hand the book then continues by reviewing early successful established and experimental concepts for SUI design The book then concludes by discussing how we can analyse and evaluate the on going developments in SUI design as this multidisciplinary area of research moves forwards Finally in reviewing these many SUIs and SUI features the book finishes by extracting a series of 20 SUI design recommendations that are listed in the conclusions Table of Contents Introduction Searcher Computer Interaction Early Search User Interfaces Modern Search User Interfaces Experimental Search User Interfaces Evaluating Search User Interfaces Conclusions      **Search User Interface**
