Ludicrous Edward Niedermeyer,2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company s market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla s commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla s strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla s approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it s never been told before with clear eyes objectivity and insight

**Age of Auto Electric** Matthew N. Eisler,2022-12-06 The electric

vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In Age of Auto Electric Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking s transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries Age of Auto Electric instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed

**Business Model**

**Pioneers** Kai-Ingo Voigt,Oana Buliga,Kathrin Michl,2016-07-28 Business model innovations are conceived and implemented by a special type of entrepreneur business model pioneers This book presents 14 compelling case studies of business model pioneers and their companies who have successfully introduced new business ideas to the market The examples range from

industries such as retail media and entertainment to services and industrial projects For each example the book provides information on the market environment at the time of launch and illustrates the driving forces behind these business models Moreover current market developments are highlighted and linked to the evolution of the business models Lastly the authors present the profile of a typical business model pioneer *The Lithium Economy: A Critical Analysis of the Global Lithium Value Chain* Ericc Lyon,2024-12-26 The Lithium Economy provides an overview of the global lithium value chain from a variety of perspectives The first part of the book addresses an overview of the lithium market with a specific emphasis on the Lithium Triangle in South America Subsequent chapters dive into the specifics of lithium mining in the U S Subjects addressed include U S mining law the U S mining bureaucracy mining permitting requirements and how politics affect the lithium value chain in America The book then conducts a comparative analysis of lithium value chains in the U S Canada Mexico Australia Europe and China Other chapters dive into topics such as the lithium ion battery industry battery electric vehicles charging networks urban mining battery energy storage systems and Direct Lithium Extraction technology The final chapter discusses disruption to the lithium value chain to include the COVID19 pandemic global shipping inflation and the war in Ukraine Throughout the book the author focuses on critical minerals strategy leadership decision making global supply chains and competition between international actors This is a solid overview for interested readers looking to acquire a comprehensive understanding of the topic Contested Development in China's Transition to an Innovation-driven Economy Yvette To,2022-05-19 This book investigates how technology and innovation policies in contemporary China are impacted by collaboration and conflicts between different classes and interests in a world economy in which competitiveness is defined by the successful leverage of emerging technologies Focusing on the actual processes and outcomes of technological upgrading in three dynamic sectors the book presents an alternative approach to understanding China's industrial upgrading strategies by examining the ways in which the making and implementation of policies are shaped by political struggles between state actors and dominant capitalist interests in the context of global capitalism In doing so the book challenges influential institutionalist approaches as explanations of institutional change positing instead a political economy framework grounded in social conflict theory to reveal how power relationships and politics are intrinsic to the evolution form and function of institutions This book will be of key interest to scholars and students of international political economy development studies globalisation and innovation China and Chinese politics and public policy **Electronics World + Wireless World** ,1992 **Cultures of Prediction** Ann Johnson,Johannes Lenhard,2024-05-07 A probing examination of the dynamic history of predictive methods and values in science and engineering that helps us better understand today's cultures of prediction The ability to make reliable predictions based on robust and replicable methods is a defining feature of the scientific endeavor allowing engineers to determine whether a building will stand up or where a cannonball will strike Cultures of Prediction which bridges history and philosophy uncovers the dynamic history of prediction

in science and engineering over four centuries Ann Johnson and Johannes Lenhard identify four different cultures or modes of prediction in the history of science and engineering rational empirical iterative numerical and exploratory iterative They show how all four develop together and interact with one another while emphasizing that mathematization is not a single unitary process but one that has taken many forms The story is not one of the triumph of abstract mathematics or technology but of how different modes of prediction complementary concepts of mathematization and technology coevolved building what the authors call cultures of prediction The first part of the book examines prediction from early modernity up to the computer age The second part probes computer related cultures of prediction which focus on making things and testing their performance often in computer simulations This new orientation challenges basic tenets of the philosophy of science in which scientific theories and models are predominantly seen as explanatory rather than predictive It also influences the types of research projects that scientists and engineers undertake as well as which ones receive support from funding agencies
