If you are old enough you probably remember your first flip phone. There wasn't a lot to it but you could text take pixelated photos and sometimes even search the Internet. But then smartphones came along and things got a little bulkier. For most of us we were fine with the tradeoff.

sure they didn't fold into two so we could slip them into our pocket but they took stunning photos played impressive games and had blazing speed. But as they say history tends to repeat. Here we are years after flip phones pretty much disappeared and we have foldable phones. But these aren't your grandma's flip phones. They're everything you can expect in a smartphone but compact. If you are new to the foldable phone market there's a little bit of a learning curve and that's where this book will help. It will cover What makes Fold4 and Flip4 different from iOS, Android and other smartphones. Taking advantage of folding screens. Using the Z Pen. Setting up your phone. Making calls. Accessible Design Review Guide Robert R. Grist, 1996

A new and innovative approach to both designing and analyzing proposed and existing facilities for ADAAG compliance. With its emphasis on physical accessibility the Americans with Disabilities Act Accessibility Guidelines (ADAAG) have far reaching implications for the design or renovation of virtually all public use buildings and sites in the United States. Yet there has been little guidance on how to design and review the drawings and specifications of an existing or proposed facility to assess its ADAAG compliance. This invaluable reference provides such guidance at last for architects, interior designers, landscape architects, engineers, builders, planners, facilities managers, specification writers, construction code officials, teachers and students as well as individuals concerned with access issues. The authors present the ADAAG in an easily understandable format, grouping ADAAG criteria into detailed checklists for specific interior and exterior spaces such as offices, classrooms, retail shops, restaurants, restrooms and parking garages. This sensible approach makes the review process of any room, building or site highly manageable. For additional convenience the presentation parallels the design process from schematic design through construction documents including detail schedule and specification review. Complete with review forms, checklists, graphics and other information necessary to ensure ADAAG compliance this thorough guide will prove invaluable to everyone involved with the design or retrofit of accessible buildings and sites.
