Lisa Ginsborg, Paula Gori, 2026-02-10 This volume provides a multidisciplinary analysis of disinformation and strategies for tackling it. Authored by a diverse group of scholars and experts, chapters in this volume are divided into three thematic sections. The first section delves into disinformation from various disciplinary perspectives including philosophy, social psychology, economics, international law, data science, anthropology, political science, and history. By examining the underlying factors behind disinformation and analyzing its impact on democratic processes, this section sheds light on its complexities and reminds us that different policy responses are always grounded in different explanatory angles of the phenomenon. The second section focuses on the information ecosystem, investigating the processes, technologies, and actors involved in the spread of disinformation. By examining real world examples and the roles played by different actors and technologies, this section sheds light on the intricate workings of disinformation in different thematic and regional contexts. The book culminates in the third section, which focuses on crafting effective responses to disinformation. Chapters in this section explore policy efforts aimed at ensuring information integrity across the world and highlight the importance of fundamental rights and evidence-based policy responses encompassing self and co regulation, quality journalism, fact checking organizations, and the pivotal role media literacy initiatives.

Generative AI Art Oliver Theobald, 2024-03-13 The course introduces the basic concepts of artificial intelligence and its application in art making, making it accessible even to those without a technical background. This foundation paves the way for exploring the nuances of effective prompt crafting, a critical skill for generating bespoke AI artwork. The course focuses on hands on demonstrations with leading AI art software including Craiyon and Midjourney, offering step by step guides to harness these tools effectively. Through practical examples, learners will understand how to navigate image prompts, masking techniques, framing, and lighting to enhance the visual appeal of their creations. The significance of navigating these elements is underscored, highlighting their role in achieving consistency and originality in AI generated art. The course wraps up by delving into the remixing of popular art styles, the art of creating compelling text prompts, and the critical aspects of image rights, ethics, privacy, and originality in the digital art space. By concluding with recommended resources, learners are equipped to continue their journey in AI art, fueled by inspiration and a solid understanding of the field's possibilities and responsibilities.

Generative AI in Creative Industries Amina Al-Marzouqi, Said Salloum, Khaled Shaalan, Tarek Gaber, Ra'ed Masa'deh, 2025-07-04 This book compiles a comprehensive collection of pioneering research that addresses the multifaceted challenges and theoretical aspects of Generative AI in creative industries. Generative AI, a groundbreaking technological development, has been carving a significant niche within the creative industries. This innovative form of AI, exemplified by models like OpenAI's ChatGPT, is not only transforming the landscape of human-like text generation but is also radically reshaping creative fields such as music, literature, and visual arts. In the realm of creative industries, Generative AI serves as a catalyst for artistic innovation, offering tools for artists to push the boundaries of creativity. It assists in composing music, generating unique artworks, and even writing stories or scripts, thereby democratizing the creative process. The integration of Generative AI in these industries promises a synergy between human creativity and machine intelligence, potentially leading to novel genres and forms of art. Despite its transformative potential, the incorporation of Generative AI in creative fields is not devoid of challenges. Ethical considerations such as authorship rights, originality, and the impact on traditional creative roles are pivotal. Moreover, the authenticity and emotional depth of AI-generated content compared to human-created art is a subject of ongoing debate. The book aims to feature original manuscripts encompassing a wide array of topics from the development of new generative technologies and their practical application in creative fields to critical analysis of the ethical, legal, and cultural implications of these systems. By gathering the latest advancements in this field and spotlighting emerging avenues for research, this book serves as an invaluable resource and guide for researchers, artists, and practitioners operating at the intersection of Generative AI and creative industries.
