Generic and Indexed Programming Jeremy Gibbons,2012-07-20 Generic programming is about making programs more widely applicable via exotic kinds of parametrization not just along the dimensions of values or of types but also of things such as the shape of data algebraic structures strategies computational paradigms and so on Indexed programming is a lightweight form of dependently typed programming constraining flexibility by allowing one to state and check relationships between parameters that the shapes of two arguments agree that an encoded value matches some type that values transmitted along a channel conform to the stated protocol and so on The two forces of genericity and indexing balance each other nicely simultaneously promoting and controlling generality The 5 lectures included in this book stem from the Spring School on Generic and Indexed Programming held in Oxford UK in March 2010 as a closing activity of the generic and indexed programming project at Oxford which took place in the years 2006 2010

A Survey on Today's Smartphone Usage
Tobias Himmelsbach, 2012-05-26 Diploma Thesis from the year 2011 in the subject Computer Science Miscellaneous grade 2
3 Technical University of Berlin Agententechnologien in betrieblichen Anwendungen language English abstract The
smartphone market is evolving rapidly irrespective of the well known spread within the business sector In recent years the
average users tend to replace their traditional mobile phones PDAs and Palms with smartphones These devices have become
a pervasive part of everyday life Dealing with huge amounts of data the mobile device s and application s demand for certain
security standards cannot be underestimated In recent studies the individual user s needs in terms of technical features
applications etc have not been addressed and analyzed properly To capture the problem in its full extent it is vital to
understand the user s expectations Besides the usage patterns have to be described especially against the background of
security aspects As mentioned before recent analyzes did not specifically ask what the user expects from a smartphone
Hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect
taking into consideration security aspects An international web based online survey was designed and performed to measure
and analyze users behaviour when using smartphones with the aim of finding out what they want and expect from a
smartphone The main goals were to identify user needs in the context of smartphones to analyze their knowledge and
acquisition to security aspects and to get significant data about the user s behaviour The main findings of the survey are that
on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone
calls writing messages or storing contacts On the other hand they want a smartphone to provide mobile internet access
navigation features multimedia aspects a comfortable usability and a good lo
