**CQ**, 2000 **Elijah Muhammad and Supreme Literacy** Lydia Magras Muhammad, 2022-03-08 Elijah Muhammad and the Supreme of Literacy explores how Elijah Muhammad framed the term literacy as contrasted with its generally known definitions and applications The text frames a construct for understanding why Elijah Muhammad considered the science of literacy essential to the success of the Blackman and woman in America specifically and people in general It outlines the

scriptural foundations of Muhammad's teachings drawn from both Bible and Qur'an. A detailed review of the course of study prescribed for his followers supplies Elijah Muhammad's unique perspective on both literacy and language. Examples of his study curricula are offered. A brief history of Muhammad's own educational process is presented with an emphasis on the pedagogy of literacy as practiced by Muhammad's teacher W. D. Fard. Material on the early educational focus of The Nation of Islam is introduced. And finally, general commentary on the teachings is made known through the lenses of three men in their role as teachers: W. D. Fard, teacher of Elijah Muhammad; Muhammad himself; and Minister Louis Farrakhan, student of Elijah Muhammad.

The independent bi-weekly newsletter on research in education and learning      International Books in Print, 1991      Helping Struggling Learners in the Elementary and Middle Grades Nancy Protheroe, Elizabeth Shellard, Jennifer Turner, 2004

Helping students to become active and engaged learners at an early age is key to their success throughout their school years, not only to raise test scores but to raise student achievement in a more meaningful way. If school staff work together making maximum use of the knowledge base about teaching and learning, they will help students become more engaged, independent, and effective learners. This report demonstrates that helping struggling learners become successful requires more than an emphasis on basic skills. The report addresses topics such as individualising instruction, effective reading and maths instruction for struggling learners, ways to help students develop as more effective learners, student motivation, effective classroom management, and the characteristics of good teaching. Each of these will help educators develop a multifaceted approach to help teachers meet the needs of their struggling learners.
