

The Project 2016 Program Screen

Project Fundamentals

Create a New Project: Click the File tab, select New, and click Blank Project.

Open a File: Click the File tab and select Open, or press **Ctrl + O**. Select a location with a file you want, then select a file and click Open.

Save a File: Click the File tab and select Save, or press **Ctrl + S**. Choose a location where you want to save the file. Give the file a name, then click Save.

Set Project Information: Click the Project tab, click the Set Information button, click the Set Information button, click the Set Information button, then select the project name from the start date or finish date, and select the start date or finish date. Click the Calendar list arrow and select an option, then click OK.

Create a New Project Calendar: Click the Project tab and click the Change Working Time button. Click the Create New Calendar button, type a name for the calendar, and click OK.

Change Work Days and Hours: Click the Project tab and click the Change Working Time button. Click the Work Weeks tab, click the Details button, and select a day to modify the work hours. Click OK twice to close the dialog boxes.

Project Viewers

Change Viewer: Click the Viewer tab and select a view, or click one of the view buttons at the bottom of the window.

- Chart:** Displays the task sheet on the left and graphical bars on the right.
- Task Usage:** Displays all tasks and the resources assigned to them.
- Calendar:** Displays the project tasks in a calendar view.
- Task Planner:** Displays resources' work over time.
- Resource Sheet:** Displays a list of resources and their details.

Turn on the Timeline: Click the View tab on the ribbon and select the Timeline check box.

Sort Information: Click the Viewer tab on the ribbon, click the Sort \downarrow button, and select a sort option.

Filter Information: Click the Viewer tab on the ribbon, click the Filter \downarrow list arrow, and select a filter option.

Tasks

Schedule Tasks: Tasks in Project can be manually or auto-scheduled.

- Manually Scheduled Tasks:** Tasks that are scheduled. Can be planned and rescheduled in the calendar, but won't move them. You can add just the details you know and come back later to fill in additional details.
- Auto Scheduled Tasks:** Are scheduled by Project. You can't interfere with such as the task duration, cost, resources, and constraints, and Project calculates when the task should start.

Set the Task Scheduling Method: Click the New Task button in the status bar and select a scheduling method.

Insert a Task: In Gantt Chart view, click where you want to add the new task and click the Task \downarrow button on the Task tab. Type a name for the task and press Enter.

Delete a Task: Click the Task ID for the task you want to delete and press the Delete key on the keyboard.

Create a Milestone Task: Click in a blank Task Name cell, type a name for the task, and press Enter. Click the Task \downarrow button on the Task tab, type a ID, and press Enter. Milestones are just like regular tasks, but with no duration. They are represented with the \oplus symbol.

Resources

There are 3 types of resources in Project:

- Work Resources:** Resources that you assign by time. Like a computer or a person. Their cost is based on time worked.
- Material Resources:** Physical items used in completing the project. Like a computer. Their cost is not based on time.
- Cost Resources:** Resources that aren't based on time or quantity, such as travel expenses or fees.

View the Resource Sheet: Click the Viewer tab on the ribbon and click the Resource Sheet \downarrow button.

Add Work Resources: Click in the first available cell in the Resource Name field, type a resource name, and press Enter. Click the Type \downarrow list arrow and select Material. Add any known resource information.

Add Cost Resources: Click in the first

Manage Projects

Create a Baseline: Click the Project tab on the ribbon, click the Set Baseline \downarrow button, and select Set Baseline. Select Entire project or Selected tasks and click OK.

Update Actual Task Values: Select the task you want to update, click the Mark on Track \downarrow list arrow on the Task tab and select Update Task. Fill in any actual task values and click OK.

Update Task Completion: Select the task that needs the completion percentage updated. Click a Completion Percentage \downarrow button in the Schedule group of the Task tab on the ribbon.

View Project Statistics: Click the Project tab, click the Project Information \downarrow button, and click Statistics.

View Project Variance: In Task Sheet view, click the Viewer tab, click the Variance \downarrow button, and select the item you want to see variance for (e.g., cost or duration). The Variance column displays the difference between the baseline values and actual values entered for the project.

Reports

Create a Report: Project reports provide a graphical snapshot of project information. There are 4 main report types, which you'll find

Information and Software Technologies Tomas Skersys,Rimantas Butleris,Rita Butkiene,2013-10-06 This book constitutes the refereed proceedings of the 19th International Conference on Information and Software Technologies ICIST 2013 held in Kaunas Lithuania in October 2013 The 34 papers presented were carefully reviewed and selected from 60 submissions The papers focus on the following topics information

systems business intelligence software engineering and IT applications

Realizing Complex Integrated Systems
Anthony P. Ambler,John W. Sheppard,2025-02-20 The creation of complex integrated systems is in itself complex It requires immense planning and a large team of people with diverse backgrounds based in dispersed geographical locations and countries supposedly working to a coordinated schedule and cost The systems engineering task is not new but recent scales most definitely are The world is now capable of designing and manufacturing systems whose complexity was not considered possible 10 years ago While many are trained to think in terms of a complete system where everything is designed and produced by a single project team today such systems involve integrating subsystems and components which are also complex that have been developed by other project teams Inevitably this introduces additional complexities involving elements out of the direct control of the project but which are essential to its overall success In addition to traditional systems engineering topics of hardware and software design testability and manufacturability there are wider issues to be contemplated project planning communication language an issue for international teams units of measure imperial vs metric used across members of the team supply chains pandemics military action and natural disasters legal issues based on place of production and sale the ethics associated with target use and the threat of cyberattack This book is the first attempt to bring many of these issues together to highlight the complexities that need to be considered in modern system design It is neither exhaustive nor comprehensive but it gives pointers to the topics for the reader to follow up on in more detail

Cyber-Risk Management Atle Refsdal,Bjørnar Solhaug,Ketil Stølen,2015-10-01 This book provides a brief and general introduction to cybersecurity and cyber risk assessment Not limited to a specific approach or technique its focus is highly

pragmatic and is based on established international standards including ISO 31000 as well as industrial best practices It explains how cyber risk assessment should be conducted which techniques should be used when what the typical challenges and problems are and how they should be addressed The content is divided into three parts First part I provides a conceptual introduction to the topic of risk management in general and to cybersecurity and cyber risk management in particular Next part II presents the main stages of cyber risk assessment from context establishment to risk treatment and acceptance each illustrated by a running example Finally part III details four important challenges and how to reasonably deal with them in practice risk measurement risk scales uncertainty and low frequency risks with high consequence The target audience is mainly practitioners and students who are interested in the fundamentals and basic principles and techniques of security risk assessment as well as lecturers seeking teaching material The book provides an overview of the cyber risk assessment process the tasks involved and how to complete them in practice
