Decision-making Skills for Middle School Students Sherrel Bergmann, Gerald J. Rudman, 1985-01-01 Early adolescence is a time when students require adult assistance to become accurate and effective decision makers and problem solvers Because of the fragmented nature of society the family structure and the schooling process schools need to establish a nonthreatening environment in which students can discuss the issues related to growing up A decision making course in the middle school can become that program Results of the first six years of the decision making course at Elm Place Middle School in Highland Park Illinois are described illustrating a definite positive response on the part of all students The logistics for designing and implementing such a program in the middle school are discussed Teaching strategies projects and activities are outlined Sample activities are appended along with sample communications to parents and students JD
