Popular Music in a Digital Music Economy Tim J. Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather, it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object-based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience: the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments.

MARKETING LESSONS Makarand Upadhyaya, Binod Mishra, Saveeta Pawar, 2021-05-29 Solving a marketing case study doesn't only mean understanding one company. You need to focus on the entire market associated with that company. Without a market, the company cannot have a business to focus on. And that's why companies create market segments to categorize where the business would be more successful. Why do companies make it to the top ranks? Because of the stronger foundation and thorough understanding of the market. When you choose a case to study, you choose a whole bunch of related cases in it. As mentioned in the first chapter, there are six ways to write a case study. Your objective should be clear, and your research should be focused on the specified factors of the companies. Marketing case studies are different. Your focus is not only on the specifications of the case but rather on the promotional and marketing strategies applied by the case to gain recognition. Today, the market has changed a lot; companies are evolving, and naturally, the marketing strategies are changing with time. Social media is making more impact than television or news marketing. However, traditional marketing ways are still alive, and some companies are still using them. For example, Casper uses banners and posters in public areas yet plans social media campaigns. Spotify uses television ads in some countries to target different sets of audiences.

Digital Platforms and the Global South Philippe Bouquillion, Christine Ithurbe, Tristan Mattelart, 2023-12-01 This book addresses the issues raised by digital platforms in the Global South with an emphasis on the cultural stakes involved. It brings together an interdisciplinary team of researchers including political economists, socio-economists, geographers, media sociologists, or anthropologists who each explore these issues through an insightful case study at a local, national, regional, or international scale. While studying the strategies of some of the main US-based Big Tech platforms or video streaming platforms towards the Global South, the chapters also consider the often neglected active role local or regional actors play in the expansion of those Western digital players and highlight the existence of a constellation of local or regional platforms that have emerged in Africa, Asia, Latin America, or the Middle East. In addition to analysing the

complex relationships of competition collaboration or dependence between these diverse actors this volume examines the ways in which the rise of these digital platforms has generated new forms of cultural entrepreneurship and participated in the reconfiguring of the conditions in which cultural contents are produced and circulated in the Global South This volume will appeal to readers interested in the transnationalisation of cultural industries or in the social political economic cultural and geopolitical dimensions of digital transformations and will be an important resource for students teachers and researchers in media communication cultural studies international relations and area studies programmes The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
