Texas vs. California Kenneth P. Miller, 2020-07-14 Texas and California are the leaders of Red and Blue America As the nation has polarized its most populous and economically powerful states have taken charge of the opposing camps These states now advance sharply contrasting political and policy agendas and view themselves as competitors for control of the nation's future Kenneth P Miller provides a detailed account of the rivalry's emergence present state and possible future First he explores why despite their many similarities the two states have become so deeply divided As he shows they experienced critical differences in their origins and in their later demographic economic cultural and political development Second he describes how Texas and California have constructed opposing comprehensive policy models one conservative the other progressive Miller highlights the states contrasting policies in five

areas tax labor energy and environment poverty and social issues and also shows how Texas and California have led the red and blue state blocs in seeking to influence federal policy in these areas The book concludes by assessing two models strengths vulnerabilities and future prospects The rivalry between the two states will likely continue for the foreseeable future because California will surely stay blue and Texas will likely remain red The challenge for the two states and for the nation as a whole is to view the competition in a positive light and turn it to productive ends Exploring one of the primary rifts in American politics Texas vs California sheds light on virtually every aspect of the country s political system

Design, Control, Predict Aaron Shapiro, 2020-12-15 An in depth look at life in the smart city Technology has fundamentally transformed urban life But today s smart cities look little like what experts had predicted Aaron Shapiro shows us the true face of the revolution in urban technology taking the reader on a tour of today s smart city Along the way he develops a new lens for interpreting urban technologies logistical governance to critique an urban future based on extraction and rationalization Through ethnographic research journalistic interviews and his own hands on experience Shapiro helps us peer through cracks in the smart city s facade He investigates the true price New Yorkers pay for free ad funded WiFi finding that it ultimately serves the ends of commercial media He also builds on his experience as a bike courier for a food delivery startup to examine how promises of flexible employment in the gig economy in fact pave the way for strict managerial control And he turns his eye toward hot button debates around police violence and new patrol technologies asking whether algorithms are really the answer to reforming our cities ongoing crises of criminal justice Through these gripping accounts of the new technological urbanism Design Control Predict makes vital contributions to conversations around data privacy and algorithmic governance Shapiro brings much needed empirical research to a field that has often relied on 10 000 foot views Timely important and expertly researched Design Control Predict doesn t just help us comprehend urbanism today it advances strategies for critiquing and resisting a dystopian future that can seem inevitable *Evidence-Based Recruiting:*

The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical Robert Siegel, 2021-07-27 A Top Financial Times Recommended Business Book The Brains and Brawn Company is the grounded clear sighted guide you need to blend digital and traditional business functions for long term competitive advantage Business leaders are continually told they need to embrace digital disruption wholeheartedly to thrive in the 21st Century Legacy companies we hear are all doomed to fail unless they double down on the latest digital innovations and disruptors are ordained to take over the world Digital innovation is the answer to everything False Nothing in life or business is ever that simple In The Brains and Brawn Company How Leading Organizations Blend the Best of Digital and Physical venture capitalist and Stanford Business School lecturer Robert Siegel brings the digital innovation conversation back down to earth He shows that while important digital is only part of the answer and it s never the only answer The vast majority of successful leaders from both incumbents and

disruptors focus as much on things like logistics manufacturing and distribution as they do on digital innovation. In fact many established companies are successfully countering young upstarts in other creative ways and many new organizations are learning from their older brethren. Siegel shows how to create lasting profits and growth in the smartest way possible by creating a solid partnership between digital innovation and traditional business operations in other words by marrying brains and brawn. He lays out the core competencies that today's industry leaders have mastered and explains how Charles Schwab uses cutting edge analytics to better serve millions of investors without violating its original code of values. Align Technology transformed orthodontia by developing creative new business models along with new products. Kaiser Permanente taps into the power of empathy to improve patient satisfaction while controlling costs. Instacart balances ownership and partnerships to balance the needs of four key constituencies. Target, Best Buy and Home Depot found different ways to blend the best aspects of physical retail with innovative e-commerce. Desktop Metal is innovating high volume yet affordable production methods that can revolutionize manufacturing. Filled with original research and case studies of Daimler, 23andMe, Instacart, AB InBev, Google and many other companies, *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical* provides practical, proven insights and advice for bridging the gulf between digital vs physical, disruptor vs incumbent, startup world vs Fortune 500 and tech culture vs industrial culture. *The Brains and Brawn Company: How Leading Organizations Blend the Best of Digital and Physical* provides everything you need to set your company apart from your competitors in real and measurable ways and take the lead in your industry for years to come.

Shadow Scores Naim Tahir Baig, 2025-11 BOOK DESCRIPTION Shadow Scores How Western Democracies Are Quietly Building Social Credit Empires Beyond China s Shadow While the West recoils at China s Social Credit System a parallel empire of algorithmic surveillance has emerged in liberal democracies hidden in plain sight marketed as efficiency and silently reshaping the foundations of freedom itself In Shadow Scores investigative journalist Dr Naim Tahir Baig exposes how the United States Europe and India have constructed sophisticated social credit architectures that rival and in some ways exceed the systems they publicly condemn From Uber drivers deactivated by opaque algorithms to welfare recipients flagged as fraudulent by AI from predictive policing tools that amplify racial bias to biometric systems that deny food to the hungry this groundbreaking work reveals the creeping authoritarianism hiding behind the facade of technological progress Drawing on over 100 verified sources including court documents policy analyses and interviews with more than 50 affected individuals Baig meticulously documents how gig economy platforms have become unelected governors how Europe s data protection laws contain dangerous blind spots and how India s massive Aadhaar biometric system has created a digital caste hierarchy He traces the evolution from 19th century credit ledgers to today s all encompassing behavioral scores revealing how Big Tech s lobbying has systematically weakened regulations designed to protect citizens from algorithmic tyranny But Shadow Scores is more than an expos it s a call to action Through vivid case studies of real people trapped in algorithmic poverty cycles denied justice by biased risk assessments and stripped of privacy by surveillance capitalism Baig illustrates the profound human cost of allowing private corporations to wield governmental power without accountability He challenges the techno orientalist narrative that frames China as uniquely dystopian while Western democracies quietly deploy similar tools under the guise of efficiency and innovation This urgent accessible investigation draws disturbing parallels between science fiction warnings and present day reality documenting how the invisible ledger of trust maintained by platforms like Uber Airbnb and DoorDash enforced by welfare fraud detection algorithms and legitimized by inadequate regulation is fundamentally reshaping democracy itself As artificial intelligence becomes increasingly embedded in decisions about employment criminal justice housing and social services the question is no longer whether algorithmic governance will define our future but whether we will reclaim democratic control before it s too late Shadow Scores offers both a wake up call and a roadmap for resistance highlighting successful legal challenges worker organizing efforts and policy frameworks that could restore human dignity in an age of machine judgment Essential reading for anyone concerned about privacy inequality racial justice labor rights or the future of democracy in the digital age this book reveals that the greatest threat to freedom may not come from authoritarian regimes abroad but from the algorithmic empires we re building at home one score at a time
