Intermittent Fasting This Month Returns:

Fasting Against Autoimmune Disease: A Radical Reset for Inflammation, Fatigue, and the Self-Attacking Immune System Laing Z. Matthews, 2025-09-20 What if your autoimmune illness isn't a permanent defect but a sacred signal? Autoimmune disease is rising at an alarming rate. Hashimoto's, lupus, psoriasis, rheumatoid arthritis, multiple sclerosis, inflammatory bowel disease—these conditions now affect tens of millions, with conventional medicine offering lifelong suppression, not real solutions. This book proposes something radically different. That autoimmune illness is not a random malfunction but a breakdown in rhythm, clarity, and communication between the body, the soul, and time itself. *Fasting Against Autoimmune Disease* presents a groundbreaking framework where fasting is not starvation but sacred repair. Rooted in the science of immunology, autophagy, gut restoration, and mitochondrial healing, yet guided by ancient Daoist wisdom, this book reframes illness as an intelligent response to overload, distortion, and forgotten selfhood. You'll learn why autoimmune illness often arises in those who carry too much, feel too much, and endure too long. How modern life fragments circadian, immunological, and hormonal balance. Why fasting resets the immune system through rhythmic silence, not aggression. The truth about the gut-immune-brain axis and how fasting repairs the terrain. Why autoimmune flares may be your body's cry to remember who you are. Inside are clear, practical fasting protocols for Hashimoto's, hypothyroidism, and hormone dysregulation. Lupus, rheumatoid arthritis, and inflammatory pain. Psoriasis, eczema, and skin-based flares. Crohn's, ulcerative colitis, and leaky gut. Long COVID, post-viral fatigue, and immune confusion. And sensitive cases needing adaptive, gentle approaches. You'll also discover how Shen (spirit) and Wei Qi (immune field) are connected. Why emotional boundaries matter as much as dietary ones. How to reintroduce food without collapsing your healing. Breathwork, qi gong, and rituals for immune harmony. How to live the immune Dao, the daily rhythm of sovereignty. Whether you're newly diagnosed or decades deep in autoimmune struggle, this book will help you see your condition not as a curse to fight but as a path to walk with clarity, power, and peace. This is not a book about what to fear. It's a book about what to remember. From the author of the *Fasting Against* series, including *Fasting Against Cancer*, *Fasting Against Diabetes*, and *Fasting Against Heart Disease*, this volume brings together ancient medicine, modern science, and spiritual insight to offer a new path forward, one that begins in emptiness and leads back to wholeness. Biochemistry of Cardiovascular Dysfunction in Obesity Paramjit S. Tappia, Sukhwinder K. Bhullar, Naranjan S. Dhalla, 2020-10-03 Obesity is an independent risk factor for cardiovascular disease (CVD) in adults as well as in obese children. This book will provide a description of the impact of obesity on the cardiovascular system and increased predisposition to CVD. It will identify the major biochemical mechanisms that lead to the occurrence of myocardial abnormalities and vascular alterations in obesity. We will also have some discussion on the biochemistry of the so-called obesity paradox in relation to CVD. The contributors to this book are international experts on obesity and associated cardiovascular complications. This book

is also uniquely positioned as it focuses on the biochemistry of obesity induced cardiovascular dysfunction There are 20 chapters in 2 different parts in this book comprising of Part A Pathophysiology of Cardiovascular Complications in Obesity 11 chapters and Part B Modification of Cardiovascular Dysfunction in obesity 9 chapters The intent of this volume is to provide current and basic understanding of the biochemical mechanisms of obesity induced cardiovascular dysfunction that will be of value not only to cardiologists and other allied health professionals but will also stimulate and motivate biomedical researchers and scientists to find the way to prevent the epidemic of obesity associated cardiovascular abnormalities Furthermore this book will serve as a highly useful resource for medical students fellows residents and graduate students with an interest in the cardiovascular system In summary this book covers a broad range of biochemical mechanisms of obesity induced cardiovascular complications We hope that the reader will understand that obesity is linked to an increase in the risk and occurrence of fatal CVD Furthermore the underlying message presented in the book is that the cause of obesity related disorders is complex and that understanding the biochemistry of cardiovascular dysfunction may contribute to the development of novel interventions for the prevention and treatment of obesity associated comorbidities **AARP The**
