Multimedia Semantics Metadata Analysis And Interaction:

Multimedia Semantics Raphael Troncy, Benoit Huet, Simon Schenk, 2011-07-18 In this book the authors present the latest research results in the multimedia and semantic web communities bridging the Semantic Gap. This book explains, collects and reports on the latest research results that aim at narrowing the so called multimedia Semantic Gap the large disparity between descriptions of multimedia content that can be computed automatically and the richness and subjectivity of semantics in user queries and human interpretations of audiovisual media. Addressing the grand challenge posed by the Semantic Gap requires a multi disciplinary approach computer science, computer vision and signal processing, cognitive science, web science, etc. and this is reflected in recent research in this area. In addition the book targets an interdisciplinary community and in particular the Multimedia and the Semantic Web communities. Finally the authors provide both the fundamental knowledge and the latest state of the art results from both communities with the goal of making the knowledge of one community available to the other. Key Features: Presents state of the art research results in multimedia semantics, multimedia analysis, metadata standards and multimedia knowledge representation; semantic interaction with multimedia. Contains real industrial problems exemplified by user case scenarios. Offers an insight into various standardisation bodies including W3C, IPTC and ISO MPEG. Contains contributions from academic and industrial communities from Europe, USA and Asia. Includes an accompanying website containing user cases, datasets and software mentioned in the book as well as links to the K Space NoE and the SMaRT society web sites <http://www.multimediasemantics.com>. This book will be a valuable reference for academic and industry researchers, practitioners in multimedia, computational intelligence and computer science fields. Graduate students, project leaders and consultants will also find this book of interest.

Transactions on Computational Collective Intelligence XXI Ngoc Thanh Nguyen, Ryszard Kowalczyk, Paulo Rupino da Cunha, 2016-03-04 These transactions publish research in computer based methods of computational collective intelligence (CCI) and their applications in a wide range of fields such as the semantic Web, social networks and multi agent systems. TCCI strives to cover new methodological, theoretical and practical aspects of CCI understood as the form of intelligence that emerges from the collaboration and competition of many individuals, artificial and/or natural. The application of multiple computational intelligence technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc. aims to support human and other collective intelligence and to create new forms of CCI in natural and/or artificial systems. This

twenty first issue contains 7 carefully selected and revised contributions. **Semantic Computing** Phillip Chen-yu Sheu, 2017-08-23 As the first volume of World Scientific Encyclopedia with Semantic Computing and Robotic Intelligence this volume is designed to lay the foundation for the understanding of the Semantic Computing (SC) as a core concept to study Robotic Intelligence in the subsequent volumes. This volume aims to provide a reference to the development of Semantic Computing in the terms of meaning, context and intention. It brings together a series of technical notes in average no longer

than 10 pages in length each focuses on one topic in Semantic Computing being review article or research paper to explain the fundamental concepts models or algorithms and possible applications of the technology concerned This volume will address three core areas in Semantic Computing *Computation for Humanity* Justyna Zander,Pieter

Mosterman,2018-10-03 The exponential progress and accessibility of computing has vastly increased data flows and revolutionized the practice of science engineering and communication Computing plays a critical role in advancing research across almost every scientific discipline Computation for Humanity Information Technology to Advance Society is a guide for the creation of services products and tools that facilitate support and enhance progress of humanity toward more sustainable life This book Provides a deep understanding of the practical applications of computation to solve human machine problems Delivers insight into theoretical approaches in an accessible manner Provides a comprehensive overview of computational science and engineering applications in selected disciplines Crosses the boundaries between different domains and shows how they interrelate and complement one another Focuses on grand challenges and issues that matter for the future of humanity Shows different perspectives of computational thinking understanding and reasoning Provides a basis for scientific discoveries and enables adopting scientific theories and engineering practices from other disciplines Takes a step back to provide a human related abstraction level that is not ultimately seen in pure technological elaborations collections The editors provide a collection of numerous computation related projects that form a foundation from which to cross pollinate between different disciplines and further extensive collaboration They present a clear and profound understanding of computing in today s world and provide fundamental solutions to some of the most pertinent humanity related problems

Advancing Research in Information and Communication Technology Michael Goedicke,Erich Neuhold,Kai Rannenberg,2021-08-03 For 60 years the International Federation for Information Processing IFIP has been advancing research in Information and Communication Technology ICT This book looks into both past experiences and future perspectives using the core of IFIP s competence its Technical Committees TCs and Working Groups WGs Soon after IFIP was founded it established TCs and related WGs to foster the exchange and development of the scientific and technical aspects of information processing IFIP TCs are as diverse as the different aspects of information processing but they share the following aims To establish and maintain liaison with national and international organizations with allied interests and to foster cooperative action collaborative research and information exchange To identify subjects and priorities for research to stimulate theoretical work on fundamental issues and to foster fundamental research which will underpin future development To provide a forum for professionals with a view to promoting the study collection exchange and dissemination of ideas information and research findings and thereby to promote the state of the art To seek and use the most effective ways of disseminating information about IFIP s work including the organization of conferences workshops and symposia and the timely production of relevant publications To have special regard for the needs of developing countries and to seek

practicable ways of working with them To encourage communication and to promote interaction between users practitioners and researchers To foster interdisciplinary work and in particular to collaborate with other Technical Committees and Working Groups The 17 contributions in this book describe the scientific technical and further work in TCs and WGs and in many cases also assess the future consequences of the work s results These contributions explore the developments of IFIP and the ICT profession now and over the next 60 years The contributions are arranged per TC and conclude with the chapter on the IFIP code of ethics and conduct **A Semantic Time Framework for Interactive Media Systems** Eric Lee,2007
