*Multimedia Systems, Standards, and Networks* Atul Puri,2000-03-22 Describes ITU H H 323 and H 324 H 263 ITU T video and MPEG 4 standards systems and coding IP and ATM networks multimedia search and retrieval image retrieval in digital laboratories and the status and direction of MPEG 7    *Introduction to Broadband Communication Systems* Cajetan M. Akujuobi,Matthew N.O. Sadiku,2007-11-28 Broadband networks such as asynchronous transfer mode ATM frame relay and leased lines allow us to easily access multimedia services data voice and video in one package Exploring why broadband networks are important in modern day telecommunications Introduction to Broadband Communication Systems covers the concepts and components of both    *The Multimedia Internet* Stephen Weinstein,2005-03-30 Here is a thorough not too complex introduction to the technical foundations for multimedia applications across the Internet communications principles technologies and networking compressive encoding of digital media and Internet protocol and services The book is well suited to non specialists with some technical background    **Video Processing and Communications** Yao Wang,Jörn Ostermann,Ya-Qin Zhang,2002 Useful as a reference work this book offers a good balance between theoretical concepts and practical solutions with more rigorous formulation of certain problems such as motion estimation sampling basic coding theory Provides an in depth exposition of fundamental theory and techniques for video processing including frequency domain characterization of video signals and visual perception video sampling and format conversion two dimensional and three dimensional motion estimation Also presents techniques important for video communications including video coding and error control and up to date coverage on recent international standards on video communications A chapter is devoted to video streaming over Internet and wireless networks one of the most popular video communication applications In addition it discusses processing and communications of stereoscopic and multiview video Practicing researchers and engineers

*Fundamentals of Multimedia* Ze-Nian Li,Mark S. Drew,Jiangchuan Liu,2014-04-09 This textbook introduces the Fundamentals of Multimedia addressing real issues commonly faced in the workplace The essential concepts are explained in a practical way to enable students to apply their existing skills to address problems in multimedia Fully revised and updated this new edition now includes coverage of such topics as 3D TV social networks high efficiency video compression and conferencing wireless and mobile networks and their attendant technologies Features presents an overview of the key concepts in multimedia including color science reviews lossless and lossy compression methods for image video and audio data examines the demands placed by multimedia communications on wired and wireless networks discusses the impact of social media and cloud computing on information sharing and on multimedia content search and retrieval includes study exercises at the end of each chapter provides supplementary resources for both students and instructors at an associated website    *Readings in Multimedia Computing and Networking* Kevin Jeffay,Hong Jiang Zhang,2001-08-10 Readings in Multimedia Computing and Networking captures the broad areas of research and developments in this burgeoning field

distills the key findings and makes them accessible to professionals researchers and students alike For the first time the most influential and innovative papers on these topics are presented in a cohesive form giving shape to the diverse area of multimedia computing The seminal moments are recorded by a dozen visionaries in the field and each contributing editor provides a context for their area of research by way of a thoughtful focused chapter introduction The volume editors Kevin Jeffay and HongJiang Zhang offer further incisive interpretations of past and present developments in this area including those within media and content processing operating systems and networking support for multimedia This book will provide you with a sound understanding of the theoretical and practical issues at work in the field s continuing evolution Offers an in depth look at the technical challenges in multimedia and provides real and potential solutions that promise to expand the role of multimedia in business entertainment and education Examines in Part One issues at the heart of multimedia processes the means by which multimedia data are coded compressed indexed retrieved and otherwise manipulated Examines in Part Two the accommodation of these processes by storage systems operating systems network protocols and applications Written by leading researchers the introductions give shape to a field that is continually defining itself and place the key research findings in context to those who need to understand the state of the art developments

**Multimedia Communication Systems** Kamisetty Ramamohan Rao,Z. S. Bojkovic,Dragorad A. Milovanovic,2002 With extensive coverage of multimedia communications standards and processing techniques this guide presents new approaches to traffic management services deployment and QoS for networked multimedia systems It contains many practical examples more than 200 figures and over 400 references

**The Handbook of Computer Networks, Key Concepts, Data Transmission, and Digital and Optical Networks** Hossein Bidgoli,2008 A complete and in depth introduction to computer networks and networking In this first volume of The Handbook of Computer Networks readers will get a complete overview of the key concepts of computers networks data transmission and digital and optical networks Providing a comprehensive examination of computer networks the book is designed for both undergraduate students and professionals working in a variety of computer network dependent industries With input from over 270 experts in the field the text offers an easy to follow progression through each topic and focuses on fields and technologies that have widespread application in the real world

*A Guided Tour of Multimedia Systems and Applications* Borivoje Furht,Milan Milenković,1995 Now computers can provide sensory rich and engaging forms of interaction that have the potential for increasing users understanding and retention and enhancing numerous existing applications as well as facilitating some new ones

**Proceedings, International Conference on Image Processing** ,1997 Papers from this conference on image processing are aimed at researchers professors practitioners students and other computing professionals

**Speech Enhancement** Philipos C. Loizou,2007-06-07 This book covers traditional speech enhancement

algorithms such as spectral subtraction and Wiener filtering algorithms as well as state of the art algorithms including minimum mean squared error algorithms that incorporate signal presence uncertainty and subspace algorithms that incorporate psychoacoustic models. The coverage includes objective and subjective measures used to evaluate speech quality and intelligibility. Divided into three parts the book presents the digital signal processing and speech signal fundamentals needed to understand speech enhancement algorithms the various classes of speech enhancement algorithms proposed over the last two decades and the methods and measures used to evaluate the performance of speech enhancement algorithms.

**Wiley Encyclopedia of Telecommunications** John G. Proakis, 2003      **Recent Advances in Multimedia Signal Processing and Communications** Mislav Grgic, Kresimir Delac, Mohammed Ghanbari, 2009-09-30 The rapid increase in computing power and communication speed coupled with computer storage facilities availability has led to a new age of multimedia applications. Multimedia is practically everywhere and all around us we can feel its presence in almost all applications ranging from online video databases, IPTV, interactive multimedia and more recently in multimedia based social interaction. These new growing applications require high quality data storage, easy access to multimedia content and reliable delivery. Moving ever closer to commercial placement also aroused a higher awareness of security and intellectual property management issues. All the aforementioned requirements resulted in higher demands on various areas of research signal processing, image, video processing and analysis, communication protocols, content search, watermarking, etc. This book covers the most prominent research issues in multimedia and is divided into four main sections: i) content based retrieval, ii) storage and remote access, iii) watermarking and copyright protection, and iv) multimedia applications. Chapter 1 of the first section presents an analysis on how color is used and why it is crucial in nowadays multimedia applications. In chapter 2 the authors give an overview of the advances in video abstraction for fast content browsing, transmission, retrieval and skimming in large video databases and chapter 3 extends the discussion on video summarization even further. Content retrieval problem is tackled in chapter 4 by describing a novel method for producing meaningful segments suitable for MPEG 7 description based on binary partition trees (BPTs).
