It's all there in the unique Murach style that has been training professional programmers for more than 25 years. Includes CD Rom.

Forthcoming Books Rose Arny,2002-04 Java Programming Exercises Christian Ullensboom,2024-09-04 Take the first step in raising your coding skills to the next level and test your Java knowledge on tricky programming tasks with the help of the pirate Captain CiaoCiao. This is the first of two volumes which provide you with everything you need to excel in your Java journey including tricks that you should know in detail as a professional as well as intensive training for clean code and thoughtful design that carries even complex software Features. About 200 tasks with commented solutions on different levels. For all paradigms object oriented, imperative and functional. Clean code reading, foreign code and object oriented modeling. With numerous best practices and extensively commented solutions to the tasks these books provide the perfect workout for professional software development with Java.

**Program Practically with Java Scenarios and Solutions** Gerry Byrne,2022-01-08 About the book The book is compiled to complement either of the two books Program Practically with Java Eclipse IDE Version or Program Practically with Java IntelliJ IDEA Version. The book consists of 100 exercises and accompanying suggested solutions which follow at the end of the 100 exercises. The aim is to help you reinforce your Java programming skills and is part of the Build your programming muscle series by the same author which currently includes the books PROGRAM PRACTICALLY WITH JAVA Eclipse IDE Version, PROGRAM PRACTICALLY WITH JAVA IntelliJ IDEA IDE Version, PROGRAM PRACTICALLY WITH JAVA Scenarios and Solutions. The 100 exercises are split into 10 Labs each with 10 exercises and further details of two approaches to using the book labs and exercises is given within the next page. The book exercises are aimed at giving you hands on practical programming experience which is essential if you wish to get the best understanding of the Java language. Hands on experience whilst reading this book is the key to success. Remember, Life begins at the edge of our comfort zone. Think about now and believe. Often the thought of getting started can make us frightened and uncomfortable. Programming can be rewarding and completing the exercises will enhance your programming skills and how to debug code as you fix the errors that will inevitably arise. As you complete the labs and exercises think about learning as a dot. When you start the exercises your Java learning dot is small but as you progress with the exercises the dot will increase in size. It is not how big the dot becomes that is important but simply that the dot is increasing. No matter how expert someone is at Java there will always be an opportunity to learn more and as such the dot continually gets larger.
