comprises an integrated review of ocular therapeutics across all relevant fields. It addresses the real world requirements of ophthalmologists, pharmacists and optometrists as observed through working alongside these practitioners for two decades. Knowledge surrounding agents used in ophthalmic practice has historically been scattered. The book facilitates understanding of ocular drug therapy by compiling all key aspects of the pharmacology, toxicology, pharmaceutical science, ocular biochemistry and cell biology of these agents. Chapters detail drug transfer across barriers, systemic toxicity of topically applied drugs, autonomic drugs used for diagnostics as well as anti-inflammatory, antiallergic, glaucoma and antimicrobial therapies and avenues for the development of new ocular drugs. Applications of extemporaneously prepared formulations are described to inform day to day clinical practice. The use of mucoadhesive polymers in tear substitutes, ocular drug delivery systems, stem cell therapy, pharmacogenomics and antiangiogenic ocular chemotherapy are also explored. The book also provides insights from drugs of herbal origin and a historical perspective on drugs for ocular use. Practicing and resident ophthalmologists, optometrists, pharmacists, nursing professionals, scholars in ocular drug research and students will equally benefit from this comprehensive guide.

**Ocular Therapeutics, 2e (HB)** Biswas, Gupta, N. R. Biswas, Viney

Gupta, 2004    Ocular Therapeutics Louis de Wecker, 1879    Ocular Therapeutics L. De Wecker, 2015-08-06 Excerpt from Ocular Therapeutics With Illustrations This work was originally delivered in the form of clinical lectures during the years 1877-8 to the students and practitioners both French and foreign who attended Professor de Wecker's well known clinique in the Rue du Cher die Midi. The lectures were at the time reported verbatim by Dr Masselon the Chef de Clinique and afterwards revised and amplified by the Professor himself and published as a whole. They will it is hoped be followed by the translation of a similar volume recently published and dealing exclusively with Ocular Surgery. The reception which these lectures have met with in France has been most satisfactory they have been translated into Italian and Spanish and will shortly appear in German. In spite of the many able treatises which exist on Ophthalmology in the English language it is believed that there is ample room for a work like the present. While intended primarily and chiefly for practitioners of general medicine it will also it is hoped in many respects be found not unworthy the attention of specialists. Ellis,1963     **Ocular Therapeutics According to the Most Recent Discoveries** Dr. A. Darier,2015-06-12 Excerpt from Ocular Therapeutics According to the Most Recent Discoveries This more or less literal translation has been made from the second edition of Dr A Darier s *Le ons de therapeutique oculaire* In presenting it to the medical profession I feel that no apology is called for inasmuch as the author enters into new remedies and methods of treatment that are yet scarcely known in this country besides describing fully the better understood treatments commonly adopted for the cure of eye disease Indeed it may be safely said that even the most experienced ophthalmic surgeon has something to learn about the treatment of eye disease from a perusal of Dr Darier s book The almost purely personal character of the Lectures has been criticised in some quarters It is mainly accounted for by the fact that they are the outcome of Dr Darier s own researches into the action of the remedies he deals with In my opinion it is a good rather than a bad point Dr Darier has been kind enough to revise the proof sheets of this translation and in doing so has made important additions to many of the sections He has moreover added two new chapters XXII and XXV which have not yet appeared in the original work They cannot but add to the completeness and value of the book The metrical system adopted in the original work has been retained unaltered in the translation Finally it should be noted that *Le ons de th rapeutique oculaire* has been awarded the Desportes Prize 1902 by the French Academy of Medicine as the best work published on practical therapeutics About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish
