**Labour Force Statistics** Organisation for Economic Co-operation and Development,1977 *The Political Power of Global Corporations* John Mikler,2018-02-12 We have long been told that corporations rule the world their interests seemingly taking precedence over states and their citizens Yet while states civil society and international organizations are well drawn in terms of their institutions ideologies and functions the world s global corporations are often more simply sketched as mechanisms of profit maximization In this book John Mikler re casts global corporations as political actors with complex identities and strategies Debunking the idea of global corporations as exclusively profit driven entities he shows how they seek not only to drive or modify the agendas of states but to govern in their own right He also explains why we need to re territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail We know the global corporations names we know where they are headquartered and we know where they invest and operate Economic processes are increasingly produced by the control they possess the relationships they have the leverage they employ the strategic decisions they make and the discourses they create to enhance acceptance of their interests This book represents a call to study how they do so rather than making assumptions based on theoretical abstractions *Labour Markets, Institutions and Inequality* Janine Berg,2015 Labour market institutions including collective bargaining the regulation of employment contracts and pension and other social protection policies are instrumental for improving the well being of workers and their families as well as societies Yet in many countries these institutions have been eroded in other countries they do not exist This edited volume examines the importance of these institutions for ensuring equitable income distribution including with empirical examples from both developed and developing countries It also analyses the connections between macroeconomic policies and inequality as well as how specific groups women migrant workers youths are affected by labour market institutions *OECD Statistics Catalogue* ,2007 Online databases CD ROMs
