Of Grave Importance: The Restoration of Institutional Cemeteries David Mack-Hardiman, 2014-06-06 More than one million people died in American asylums and institutions designed to care for people who had mental illness or developmental disabilities. To protect the privacy of patients or their families, many display no names. Patients were buried by number in the final act of institutional depersonalization. Row upon row of numbered stones or cast iron markers are all that is left for the thousands and thousands of people buried in such cemeteries. This is a story of renewal and restoration of the dignity of the unnamed dead. Cemetery Citizens Adam Rosenblatt, 2024-04-30 Across the United States groups of grassroots volunteers gather in overgrown, systemically neglected cemeteries. As they rake clean headstones and research silenced histories, they offer care to individuals who were denied basic rights and forms of belonging in life and in death. Cemetery Citizens is the first book length study of this emerging form of social justice work. It focuses on how racial disparities shape the fates of the dead and asks what kinds of repair are still possible. Drawing on interviews, activist anthropology poems and drawings, Adam Rosenblatt takes us to gravesite reclamation efforts in three prominent American cities. Cemetery Citizens dives into the ethical quandaries and practical complexities of cemetery reclamation, showing how volunteers build community across social boundaries, craft new ideas about citizenship and ancestry, and expose injustices that would otherwise be suppressed. Ultimately, Rosenblatt argues that an ethic of reclamation must honor the presence of the dead, treating them as fellow cemetery citizens who share our histories, landscapes, and need for care. Gradwell, Kathryn H. Leacock, 2020-04-21 Museums and cultural institutions of all sizes and budgets are striving to remain relevant in an ever-changing landscape. This volume looks at organizations that have challenged the preconceived notions about their site and its mission by working to break into new markets and develop unexpected programs for diverse and previously untapped audiences. To address this challenge, several western New York sites developed new programs to impact their visitor engagement. History Where You Least Expect It: Site-based Strategies for Teaching about the Past features programs like learning from gingerbread playing vintage games, developing a theatrical production from places like science museums, archives, historic houses, nature centers, and cemeteries to illustrate how history can be conveyed in the most unlikely ways.

While other works exist that have examined educational pedagogy and programming according to museum type History Where You Least Expect It Site based Strategies for Teaching about the Past explores history through the lens of a specific program This volume highlights how museum programming object based learning and site specific education can impact learning for people of all ages In each chapter the reader is walked through the development implementation and successes of the organization s programs allowing practitioners the ability to learn from the work of others in order to build a successful program for themselves While the featured institutions are regionally linked the overarching goal of experiencing History Where You Least Expect It can be replicated across the globe    **Cultural Resource Laws and Practice** Thomas F.
