Windows on the Workplace Joan M. Greenbaum, 1995 In this eye opening book Joan Greenbaum tells the story of changes in management policies work organization and the design of office information systems from the 1950s to the present Windows on the Workplace takes us behind the news stories of the highly efficient high tech workplace and shows us the ways in which technologies computers mobile phones the internet have been adapted by management to reshape the way work is done In tracing the introduction of new technologies Greenbaum reveals how organizations use them to benefit from both increased profits and more intense control over the workforce Windows on the Workplace takes as its starting point the experience of office workers and their own accounts of work The book includes interviews with a wide range of workers including young people entering workplaces in which the expectation of stable long term employment is no longer the norm Greenbaum's approach is to locate their experiences and expectations within broader social and economic patterns and to show how these patterns are constantly changing The book traces the ways that freelance part time and temporary work is created and the form it takes as management outsources jobs around the world This book also exposes the myth that technology alone determines the way work is organized and outsourced Greenbaum's rapid paced prose highlights how all office work including programming and web development is being divided up into smaller parcels so that organizations can outsource the divided jobs out to new sources of cheaper labor In exposing the myths about how technologies are really created she gives readers some insight into

alternatives This updated edition offers ample evidence about how internet related jobs skills and pay scales are not increasing as the media claims as well as how work time has expanded to fill work commuting entertainment and home life
