RR-RECEIVER

Wireless General Purpose Remote Control Receiver
INSTALLATION AND PROGRAMMING INSTRUCTIONS

© ALARM LOCK 2016

WI2012A 02/16

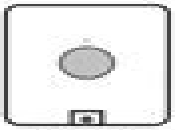
OVERVIEW

The **RR-RECEIVER** is a wireless general-purpose remote control receiver that provides remote unlocking to an Alarm Lock locking device, *or for any other application requiring a radio-controlled solid state relay closure.*

The RR-RECEIVER is factory supplied with Alarm Lock compatible battery connector plugs, simplifying installation within Alarm Lock cylindrical locking devices for wireless "remote release". The RR-RECEIVER can be used with a standard Alarm Lock battery pack or by simply cutting the power battery connector and using your own power supply (see **SPECIFICATIONS** for current consumption and power requirements).

RR-RECEIVER features include:

- Can be installed inside the lock housing to provide a "remote release" (remote unlock) function with legacy Alarm Lock locking devices (models DL2700, DL2800 or T3 non-Networx models without an integral radio
- Built-in battery connectors for quick installation inside Alarm Lock T2 or T3 locking devices
- Programmable **"Relay Closure Duration"**, **"Relay "Hold Off" Time"** and **"Relay Toggle Mode"** for advanced applications
- Compatible with both the **RR-1BUTTON** wireless remote (see WI1999) and the **RR-4BKEYFOB** 4-button pocket-size remote (see WI2004). Use a **RR-4BKEYFOB** if you want a single "keyfob remote" to activate up to 4 separate RR-RECEIVER's (for example, each button opens a separate door)
- Up to fifty (50) individual remote buttons can be "paired" (connected) to one RR-RECEIVER
- Can be used to drive high loads such as door strikes or magnetic locks by wiring to an auxiliary high current relay (see **Specifications** and **Wiring Diagram** for more information)
- Years of operation with a standard Alarm Lock battery pack (see **Specifications** below for current consumption and power requirements)
- Relay programming and remote button pairings are maintained even when power is removed
- For mortise locks, use the RR-MORTISE kit



RR-1BUTTON

RR-4BKEYFOB

Note: In this manual, "remote button" is used to describe the single button on the RR-1BUTTON (see WI1999) or any one of the four buttons on the RR-4BKEYFOB (see WI2004).

SPECIFICATIONS

Power Requirements: ..... 5-12VDC or use AL battery pack
Solid State Relay Contact Current: ..... 30mA maximum
Current Consumption: .....50 microamperes (µA) idle current

OPERATION

When a paired remote button is pressed, its paired RR-RECEIVER relay will typically close within 2 seconds of the button press, and will remain closed for its programmed **"Relay Closure Duration"** (2 seconds by default, programmable from 1-250 seconds).

After the **"Relay Closure Duration"** ends and the relay opens, an optional **Relay "Hold Off" Time** can be added during which time the RR-RECEIVER will ignore all paired remote button presses (**Relay "Hold Off" Time** is 0 seconds by default, programmable from 0-250 seconds). After the **Relay "Hold Off" Time** ends, the RR-RECEIVER is then ready to respond to the next wireless remote button press. This **Relay "Hold Off" Time** might be used for mechanical locking devices that require a minimum time to complete their operation, such as an entry gate swinging mechanism or mortise locks that require extra time to complete their mechanical operations (we recommend a minimum of 3 seconds "Hold Off" time be programmed when the RR-RECEIVER is used with Alarm Lock Exit Trim and Mortise locking devices). The columns in the table below (from left to right) summarize these RR-RECEIVER operations:

SUMMARY OF RR-RECEIVER RELAY OPERATIONS OVER TIME

Remote Button Press	RR-RECEIVER "Relay Closure Duration"	RR-RECEIVER "Relay "Hold Off" Time	RR-RECEIVER "Relay "Hold Off" Time Ends
0.5-2 sec. delay before relay closes	Default is 2 seconds; programmable between 1-250 seconds	Relay opens and ignores all paired remote button presses. Default time is zero seconds; programmable between 0-250 seconds	The RR-RECEIVER is ready to respond to the next wireless remote button press

A separate programmable relay option is **"Relay Toggle Mode"** where each press of a paired remote button causes the relay to alternate back and forth between open and closed states like a toggle switch. See **"RELAY TOGGLE MODE"** for details. **Note:** If **"Relay Toggle Mode"** is programmed, we recommend powering the RR-RECEIVER with a DC power supply, as the voltage drain due to extended relay close durations will decrease battery life. See **SPECIFICATIONS**.

CAPACITY

Up to fifty (50) individual remote buttons can be "paired" to **one** RR-RECEIVER. However, a remote button can only be paired with **one** RR-RECEIVER at a time. *If a paired remote button is later paired with a second RR-RECEIVER, the first pairing will be erased.*

GETTING STARTED

First power the RR-RECEIVER, then perform the "Pairing Procedure" and "Relay Operational Programming".

- **For installations inside Alarm Lock housings:** Jump to the section **"INSTALLATION INSIDE AN ALARM LOCK DEVICE HOUSING"**. You can perform the "Pairing Procedure" and "Relay Operational Programming" with the RR-
