

## “Oildyne” Power Trim Pump Used on Current Models

All MerCruiser Stern Drives (with transom assembly serial numbers shown below) will be equipped with an “Oildyne” Power Trim pump. (Figure 1)

**MCM 120R-thru-260R Models - Serial Number 6216687 and Above**

**MCM TR & TRS Models - Serial Number 6037486 and Above**

The “Oildyne” Power Trim pump has internal valving that eliminates the need for an external reverse lock on the engine, as was required in the past. The pump generates a higher volume, but a lower pressure than previous pumps. This, in conjunction with larger ID hydraulic hoses (gimbal housing to pump) and larger ID trim cylinders, should allow the drive unit to kick-up easier if an underwater object is struck.

### CAUTION

Due to differences in internal valving, the “Oildyne” trim pump cannot be used to replace an earlier “Prestolite” pump, or vice-versa. Use of incorrect pump will affect trim operation and may cause damage to trim system.

The “Oildyne” pump is fitted with two solenoids as standard equipment. This eliminates the need for an additional solenoid kit when installing “In-the-Handle-Trim” type remote controls, as was required in the past (on MC-1 models).

The pump motor is protected from overheating by an internal circuit breaker (in the field), which interrupts the ground circuit to the solenoids if an overheating condition is sensed. Electrical current overload protection is afforded to the pump by a 110 amp fuse. Pump also is equipped with a 20 amp circuit breaker (on older pumps) or a 20 amp fuse (on newer pumps) which serves to protect the trim control and harness from an overload. Refer to wiring diagram at back of bulletin.
