

# OGT Science Study Guide

## Physical Science

Newton's 3 laws of motion:

**1<sup>st</sup> law:** A body at rest remains at rest and a body in motion remains in motion until an outside force acts on it (**inertia**).

ex. The soccer ball will remain at rest on the field until someone kicks it. Also, after someone kicks that ball, it will stay in motion until gravity & friction from the field or another player stop it.

**2<sup>nd</sup> law:** A force causes an object to accelerate.

equation →

$$F = \text{mass} \times \text{acceleration}$$

A great example of Newton's 2<sup>nd</sup> law is in bowling. The **mass** of the bowling ball **multiplied** by **how fast** the ball is rolling determines how great the **force** is that hits the pins.

Another good example-looking at the equation →  $F = m \times a$ :

If you are traveling on the highway in your Honda Civic next to a semi truck, both vehicles are accelerating at 65mph, do they both have the same force? No, because their masses are different.
