The Death of Aztec Tenochtitlan, the Life of Mexico City Barbara E. Mundy, 2018-03-22 Winner Book Prize in Latin American Studies Colonial Section of Latin American Studies Association LASA 2016 ALAA Book Award Association for Latin American Art Arvey Foundation 2016 The capital of the Aztec empire Tenochtitlan was in its era one of the largest cities in the world Built on an island in the middle of a shallow lake its population numbered perhaps 150 000 with another 350 000 people in the urban network clustered around the lake shores In 1521 at the height of Tenochtitlan's power which extended over much of Central Mexico Hernando Cortés and his followers conquered the city Cortés boasted to King Charles V of Spain that Tenochtitlan was destroyed and razed to the ground But was it Drawing on period representations of the city in sculptures texts and maps The Death of Aztec Tenochtitlan the Life of Mexico City builds a convincing case that this global capital remained through the sixteenth century very much an Amerindian city Barbara E Mundy foregrounds the role the city's indigenous peoples the Nahua played in shaping Mexico City through the construction of permanent architecture and engagement in ceremonial actions She demonstrates that the Aztec ruling elites who retained power even after the conquest were instrumental in building and then rebuilding the city Mundy shows how the Nahua entered into mutually advantageous alliances with the Franciscans to maintain the city's sacred nodes She also focuses on the practical and symbolic role of the city's extraordinary waterworks the product of a massive ecological manipulation begun in the fifteenth century to reveal how the Nahua struggled to maintain control of water resources in early Mexico City

Native Peoples of the Gulf Coast of Mexico Alan R. Sandstrom, E. Hugo García Valencia, 2022-08-23 For too long the Gulf Coast of Mexico has been dismissed by scholars as peripheral to the Mesoamerican heartland but researchers now recognize that much can be learned from this region's cultures Peoples of the Gulf Coast particularly those in Veracruz and Tabasco share so many historical experiences and cultural features that they can fruitfully be viewed as a regional unit for research and analysis Native Peoples of the Gulf Coast of Mexico is the first book to argue that the people of this region constitute a culture area distinct from other parts of Mexico A pioneering effort by a team of international scholars who summarize hundreds of years of history this encyclopedic work chronicles the prehistory ethnohistory and contemporary issues surrounding the many and varied peoples of the Gulf Coast bringing together research on cultural groups about which little or only scattered information has been published The volume includes discussions of the prehispanic period of the Gulf Coast the ethnohistory of many of the neglected indigenous groups of Veracruz and the Huasteca the settlement of the American Mediterranean and the unique geographical and ecological context of the Chontal Maya of Tabasco It provides descriptions of the Popoluca Gulf Coast Nahua Totonac Tepehua Sierra Huastec Maya Each chapter contains a discussion of each group's language subsistence and settlement patterns social organization belief systems and history of acculturation and also examines contemporary challenges to the future of each native people As these contributions reveal Gulf Coast peoples share not only major cultural

features but also historical experiences such as domination by Hispanic elites beginning in the sixteenth century and subjection to forces of change in Mexico Yet as contemporary people have been affected by factors such as economic development increased emigration and the spread of Protestantism traditional cultures have become rallying points for ethnic identity Native Peoples of the Gulf Coast of Mexico highlights the significance of the Gulf Coast for anyone interested in the great *encuentro* between the Old and New Worlds and general processes of culture change By revealing the degree to which these cultures have converged it represents a major step toward achieving a broader understanding of the peoples of this region and will be an important reference work on these indigenous populations for years to come [Subterranean Space in Contemporary Mexico City Literature](#) Liesbeth François,2021-05-05 This book studies the role of subterranean spaces in literary works about Mexico City It analyzes how underground spaces such as the subway the sewage system tunnels crypts and the subsoil itself relate to the whole of the city in a body of works published after 1985 the year of the deadliest earthquake in the capital s history The texts belong to the most important genres in urban literature the novel the short story and the cr nica and demonstrate the crucial role played by the underground in contemporary imaginings of the megalopolis as it condenses and confronts the tensions that run through them This central idea is developed through four analytical chapters focusing on the political ecological historical and aesthetic dimension of subterranean imaginaries
