Aerodrome Design Manual: Pavements International Civil Aviation Organization, 1983 **Drainage Systems**

Muhammad Salik Javaid, 2012-03-07 The subject of drainage draining the water off is as important as irrigation application of water if not more. Drainage has a deep impact on food security, agricultural activity, hygiene and sanitation, municipal usage, land reclamation and usage, flood and debris flow control, hydrological disaster management, ecological and environmental balance, and water resource management. Drainage Systems provides the reader with a tri-dimensional expose of drainage in terms of sustainable systems, surface drainage and subsurface drainage. Ten eminent authors and their colleagues with varied technical backgrounds and experiences from around the world have dealt with an extensive range of issues concerning the drainage phenomenon. Field engineers, hydrologists, academics, and graduate students will find this book equally benefitting.

Management James C Y Guo, 2017-05-08 Effective urban drainage to manage stormwater and control flooding depends on good engineering especially when an environmentally sustainable approach is being applied. This new text focuses on green methods and modelling techniques. It covers the principles of hydrology and drainage, low impact development, LID designs, computer modelling techniques, the evaluation of existing systems and planning for both new development and urban renewal. It outlines design procedures using examples, spreadsheet models, photos and real world design examples. Unlike other books which focus on extreme events, this book covers hydrologic designs for both extreme and frequent events and reflects the latest revolution in stormwater LID management and takes a quantitative as well as a qualitative approach. PowerPoint

presentations and Excel computer models are provided to follow and build on the exercises in the book It is written especially for students on urban watershed courses and also for those studying urban planning landscaping water resources hydrology and hydraulics *Drainage Design Factors* Food and Agriculture Organization of the United Nations,1980
