Early Psychosis and Early Intervention: Clinical, Functional, and Cognitive Outcomes Wing Chung

Chang,Takahiro Nemoto,Sherry Kit Wa Chan,Young-Chul Chung,2024-09-04 Psychotic disorders are a group of severe mental disorders which affects 2 3% of the population and constitutes one of the leading causes of disability worldwide Early intervention EI represents a major paradigm shift in psychiatric service and has been demonstrated to be effective in outcome improvement for first episode psychosis FEP and at risk mental state ARMS However despite the promising findings evidence has shown that a significant proportion of early psychosis patients still experience suboptimal clinical outcomes such as high relapse risk partial remission early onset treatment resistance persistent negative symptoms etc functional impairment and cognitive dysfunction Further research clarifying the complex inter relationships among symptomatology psychosocial functioning and cognitive deficits in the early illness course as well as evaluating effects of EI on further improvement on clinical functional and cognitive outcomes in patients with early psychosis would therefore facilitate development of next generation EI service to enhance short term treatment outcomes and long term prognosis This Research Topic aims to further our understanding of the complex relationships between symptomatology psychosocial functioning and cognitive impairment in the early course of psychotic disorders including first episode psychosis FEP and at risk mental state and to evaluate the effects of early intervention either in terms of specific treatment modalities or in the comprehensive service framework on further improvement in clinical functional and cognitive outcomes in patients with early psychosis

Nursing Home Administration James Elmore Allen,2007 Contains the knowledge essential to prepare for licensure and employment as a nursing home administrator Using as its basis the guidelines of the National Association of Boards of Examiners of Nursing Home Administrators this work includes sections on Distinguishing delirium from dementia Psychosis from agitation GERD and Glycemic control *The Anxiety Relief Program* Dennis Radha-Rose,2005-01-01 Everybody has anxiety in the face of threats and dangers and this is a perfectly natural reaction But sometimes anxiety or a particular worry can get out of control and develop into disorders such as chronic and excessive worry panic attacks phobia obsession and other forms of anxiety disorder In this book each of these forms of anxiety is described from the point of view of the reader who experiences them rather than from that of psychologists or neurophysiologists whose explanations of how the brain functions in anxiety hardly help the sufferer You will gain insight into your own personal anxiety problems and learn how to cope with them yourself without medication by carrying out exercises selected for their effectiveness With an understanding of your anxieties and with the help of questionnaires you can create a personal program to bring anxiety under control
