Multimodal Interactive Pattern Recognition and Applications Alejandro Héctor Toselli, Enrique Vidal, Francisco Casacuberta, 2011-05-18 This book presents a different approach to pattern recognition PR systems in which users of a system are involved during the recognition process This can help to avoid later errors and reduce the costs associated with post processing The book also examines a range of advanced multimodal interactions between the machine and the users including handwriting speech and gestures Features presents an introduction to the fundamental concepts and general PR approaches for multimodal interaction modeling and search or inference provides numerous examples and a helpful Glossary discusses approaches for computer assisted transcription of handwritten and spoken documents examines systems for computer assisted language translation interactive text generation and parsing relevance based image retrieval and interactive document layout analysis reviews several full working prototypes of multimodal interactive PR applications including live demonstrations that can be publicly accessed on the Internet

Multimodal Interaction in Image and Video Applications Angel D. Sappa, Jordi Vitrià, 2013-01-11 Traditional Pattern Recognition PR and Computer Vision CV technologies have mainly focused on full automation even though full automation often proves elusive or unnatural in many applications where the technology is expected to assist rather than replace the human agents However not all the problems can be automatically solved being the human interaction the only way to tackle those applications Recently multimodal human interaction has become an important field of increasing interest in the research community Advanced man machine interfaces with high cognitive capabilities are a hot research topic that aims at solving challenging problems in image and video applications Actually the idea of computer interactive systems was already proposed on the early stages of computer science Nowadays the ubiquity of image sensors together with the ever increasing computing performance has open new and challenging opportunities for research in multimodal human interaction This book aims to show how existing PR and CV technologies can naturally evolve using this new paradigm The chapters of this book show different successful case studies of multimodal interactive technologies for both image and video applications They cover a wide spectrum of applications ranging from interactive handwriting transcriptions to human robot interactions in real environments
