Multinationals in Core Technologies Rob Van Tulder,Gerd Junne,1988-07-28 An attempt to describe how and why a new set of technologies emerges that all firms have to master to stay in business The authors attempt to show that core technologies in Europe much more than in the USA are developed and applied by multinational corporations

Multinationals, Technology, and the Introduction of Varieties of Goods Irene Brambilla,2006 Firms that engage in international transactions have been shown to outperform domestic firms in several dimensions This paper studies the advantages of affiliates of multinationals to grow through an expansion in their range of products I first develop a monopolistic competition model with multiproduct firms in which firms are heterogeneous in two dimensions the fixed cost of developing new varieties and the variable cost of production Multinationals have cost advantages because of economies of scale and learning by doing across countries Using firm level data for the Chinese manufacturing sector during 1998 2000 I compare the performance of foreign and domestic firms in terms of the new varieties that they introduce and as described in the model I estimate whether the number of new varieties can be explained by differences in the cost of development and variable productivity Controlling for size I find that firms with more than 50 percent of foreign ownership introduce on average more than twice as many more new varieties of goods as private domestic firms Advantages in productivity account for 33 to 45 percent of the difference in the number and sales of new varieties while advantages in the cost of development account for 5 to 17 percent of these differences *Multinationals in China* Si Zhang,Robert Pearce,2012-01-15

Multinationals China and the Global Economy analyses the results of an in depth survey of subsidiaries in China of leading manufacturing multinational enterprises MNEs It investigates the strategic roles played by these subsidiaries and the sources of technologies they access or generate in doing this It provides an original contribution to the understanding of important issues in international business the economic development of China and economics In international business this study extends our knowledge of MNEs global strategies through detailed analysis of the precise roles they expect their subsidiaries in China to play A central theme of this is how these roles relate to the development of the Chinese economy and help its positioning in the global economy Using the results of their survey the authors analyse how MNEs are operating

within the reorientation of Chinese development from low cost exporting to an innovation oriented and knowledge driven economy A very distinctive response to the growing Chinese market and its changing patterns of consumer demand emerges as a crucial factor at the core of this *Governments and Multinationals* Anant R. Negandhi,1983
