**Paediatric Dentistry** Morenike Folayan,2016 This book contains one thousand fixed response questions It is designed for students of paediatric dentistry who want to prepare for a certifying test or similar examination Most of those tests use fixed response questions This book can help students overcome some of the common problems candidates have with MRQ tests Even as a well prepared and successful medical student you likely will not be able to show how good you are in your first or even second try at a comprehensive fixed response test There is a good reason for this Fixed response questions are a blunt instrument They deny collaboration reward speed and punish nuance Unlike what one has become accustomed to in medical school mentorship caution against haste and reward for insight Without a lot of experience in fixed response tests you are like a seasoned footballer who is about to be dropped into a rugby scrum This book will help you get through it It can be used

for quick revision of various topics namely caries epidemiology prevention and management pulp therapy tooth restoration dental materials oral medicine traumatic dental injury pain and behaviour management tooth anatomy and physiology eruption and eruption disorders and general dentistry for children There are three basic kinds of fixed response questions in the book True False Questions Multiple Choice Questions and Multiple Response Questions The introduction section of the book provides readers with 10 quick guides on how to make yourself familiar with the vast material in the book At the end of the book are the answers to the questions as well as a blank answer sheet which you could use during your personal studies The book shall be revised every three years to ensure it addresses contemporary issues in paediatric dentistry as well as ensure it contains information on current concepts in paediatric dentistry
