Multiple Criteria Decision Analysis An Integrated Approach:

Multiple Criteria Decision Analysis Valerie Belton, Theodor Stewart, 2002 The field of multiple criteria decision analysis MCDA also sometimes termed multiple criteria decision aid or multiple criteria decision making MCDM has developed rapidly over the past quarter century and in the process a number of divergent schools of thought have emerged Multiple Criteria Decision Analysis An Integrated Approach provides a comprehensive yet widely accessible overview of the main streams of thought within MCDA Two principal aims are To provide sufficient awareness of the underlying philosophies and theories understanding of the practical detail of the methods and insight into practice to enable researchers students and industry practitioners to implement MCDA methods in an informed manner To develop an integrated view of MCDA incorporating both integration of different schools of thought within MCDA and integration of MCDA with broader management theory science and practice thereby informing the development of theory and practice across these areas It is felt that this two fold emphasis gives a book which will be of value to the following three groups Practicing decision analysts or graduate students in MCDA for whom this book should serve as a state of the art review especially as regards techniques outside of their own specialization Operational researchers or graduate students in OR MS who wish to extend their knowledge into the tools of MCDA Managers or management students who need to understand what MCDA can offer them

Multiple Criteria Decision Analysis Valerie Belton, Theodor Stewart, 2012-12-06 The field of multiple criteria decision analysis MCDA also termed multiple criteria decision aid or multiple criteria decision making MCDM has developed rapidly over the past quarter century and in the process a number of divergent schools of thought have emerged This can make it difficult for a new entrant into the field to develop a comprehensive appreciation of the range of tools and approaches which are available to assist decision makers in dealing with the ever present difficulties of seeking compromise or consensus between conflicting interests and goals i.e. the multiple criteria The diversity of philosophies and models makes it equally difficult for potential users of MCDA i.e. management scientists and or decision makers facing problems involving conflicting goals to gain a clear understanding of which methodologies are appropriate to their particular context Our intention in writing this book has been to provide a comprehensive yet widely accessible overview of the main streams of thought within MCDA We aim to provide readers with sufficient awareness of the underlying philosophies and theories understanding of the practical details of the methods and insight into practice to enable them to implement any of the approaches in an informed manner As the title of the book indicates our emphasis is on developing an integrated view of MCDA which we perceive to incorporate both integration of different schools of thought within MCDA and integration of MCDA with broader management theory science and practice
