<b>Claim:</b>
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Doug has written all new chapters that focus on the instructional shifts taking place as the Common Core State Standards are implemented across the United States. These introductory chapters will help you do the following: Understand the research base for comprehension strategies in content classrooms; Learn how to tap into students' background knowledge to enhance comprehension of complex texts and build new knowledge; Show learners how to question a text; Teach reading and thinking through a disciplinary lens. At the heart of this edition are more than forty classroom strategies with variations and strategy indexes that identify the instructional focus of each strategy, pinpoint the text frames in play as students read and learn, and correlate students' comprehension processes across the phases of strategy implementation. In addition, each strategy is cross-referenced with the Common Core's reading, writing, speaking, listening, and language standards.      Cultivating Coaching Mindsets Rita M. Bean, Jacy Ippolito, 2025-01-08 Now in a revised and updated second edition for today's changing K-12 landscape, this book gives instructional coaches an innovative framework for building strong relationships and enacting positive change in schools. Emphasizing a systems approach, Rita M. Bean and Jacy Ippolito explain the multiple roles of the coach as change agent, facilitator, designer, and advocate. Vivid examples show how effective coaches draw on these mindsets in working with individual teachers and groups and in developing, implementing, and sustaining schoolwide instructional programs. The book is rich with Voices from the Field vignettes, chapter-opening questions, and end-of-chapter discussion prompts, learning activities, and resources. Reproducible coaching tools can be copied from the book or downloaded from the companion website. New to This Edition: Broader scope addresses coaching across all instructional areas, not just literacy; Discussions of virtual instruction and coaching the coach's role in supporting equity and other timely topics; Significantly revised case study chapter with three new cases; Incorporates current research lessons learned in the field and the ongoing development of the mindsets model.      *Career Development for Health Professionals* Lee Haroun, 2015-10-06 Master the skills you need to succeed in the classroom and as a health care professional.
