Speech and Voice Science, Fourth Edition Alison Behrman, 2021-06-25 Speech and Voice Science Fourth Edition is the only textbook to provide comprehensive and detailed information on both voice source and vocal tract contributions to speech production. In addition, it is the only textbook to address dialectal and nonnative language differences in vowel and consonant production, bias in perception of speaker identity, and prosody suprasegmental features in detail. With the new edition, clinical application is integrated throughout the text. Due to its highly readable writing style, being user friendly for all levels of students, instructors report using this book for a wide variety of courses, including undergraduate and graduate courses in acoustic phonetics, speech science instrumentation, and voice disorders. Heavily revised and updated, this fourth edition offers multiple new resources for instructors and students to enhance classroom learning and active student participation. At the same time, this text provides flexibility to allow instructors to construct a classroom learning experience that best suits their course objectives. Speech and Voice Science now has an accompanying workbook for students by Alison Behrman and Donald Finan. New to the Fourth Edition: Sixteen new illustrations and nineteen revised illustrations, many now in color. New coverage of topics related to diversity, including Dialectal and nonnative language differences in vowel and consonant production and what makes all of us have an accent. Chapter 7 Vowels and Chapter 8 Consonants: How suprasegmental features are shaped by dialect and accent. Chapter 9 Prosody: Perception of speaker identity including race, ethnicity, gender, and accent. Chapter 11 Speech Perception: Increased focus on clinical application throughout each chapter, including three new sections. Updated Chapter 4 Breathing: Includes enhanced discussion of speech breathing and new accompanying illustrations. Updated Chapter 10 Theories of Speech Production: Now includes the DIVA Model, motor learning theory, and clinical applications. Updated Chapter 11 Speech Perception: Now includes revised Motor Learning theory, Mirror Neurons, and clinical applications. Expanded guide for students on best practices for studying in Chapter 1 Introduction. Key Features: A two-color interior to provide increased readability. Heavily illustrated, including color figures to enhance information provided in the text. Forty-nine spectrogram figures provide increased clarity of key acoustic features of vowels and consonants. Fourteen clinical cases throughout the book to help students apply speech science principles to clinical practice. Disclaimer: Please note that ancillary content such as documents, audio, and video, etc., may not be included as published in the original print version of this book.
