Promotion of Social Awareness Robert L. Selman, 2003-05-15 Education specialists have written volumes on the best ways to help children learn to read and write but who is helping them navigate the potentially treacherous waters of social interactions While in school to study children are also preoccupied with understanding the rules governing social relationships Issues of trust and loyalty rivalry and conflict belonging and exclusion affect all school aged children but very few lesson plans include social development skills The Promotion of Social Awareness summarizes thirty years of research on the social development of children in elementary and middle school and shows how this work has led to a series of programs that promote the social competence of children and adolescents Rich with lessons drawn from real life the book includes an in depth account of the author s partnership with an innovative program designed to help educators promote a sound ethic of social relationships among children a case study of a teacher particularly gifted at promoting such relationships and the tale of how the author s theoretical framework fared cross culturally when exported to Iceland The Promotion of Social Awareness documents Robert Selman s efforts both as a practitioner trying to help young people develop their interpersonal skills and as a researcher attempting to understand the factors that promote or hinder social development Selman believes that getting along with others involves concrete and measurable social skills and actions that can be taught The book underlines how the science of social development has given rise to initiatives and programs that can be used in educational settings to help children get along with each other and may in the long run help prevent violence drug abuse and prejudice Unique in its marriage of theory and practice The Promotion of Social Awareness will appeal to a wide readership including developmental psychologists educators and parents

Resources in Education, 1984 *Neuropsychological Interventions for Children - Volume 1* Caroline de Oliveira Cardoso, Natália Martins Dias, 2024-04-04 This book is the first of two volumes that aim to serve as a comprehensive guide for professionals working with neuropsychological interventions especially designed for children This first volume presents the theoretical foundations tips and guidelines for

neuropsychologists to develop different interventions such as stimulation and early intervention with a focus on promoting neuropsychological health habilitation appropriate for work with neurodevelopment disorders and rehabilitation in cases of structural alterations. In this sense it reflects the editors concern to provide material with practical tips but theoretically grounded and truly useful to professionals in clinical and also school contexts. This first volume is divided into two parts. The first addresses the theoretical and practical foundations of child neuropsychological assessment and intervention. Neuropsychological assessment is discussed with a focus on its role in guiding intervention. Also different types of interventions are presented and a taxonomy is offered according to its differential objectives of promotion or remediation and the target population: typical development, functional or structural alterations of the Nervous System leading to the suggestion of three types of interventions in neuropsychology in both clinical and school contexts: 1 Early preventive Intervention, 2 Habilitation and 3 Rehabilitation. Cognitive stimulation in different contexts such as school, family and clinical is also discussed, exploring how teachers and parents can also collaborate in intervention processes, expanding the possibilities for action beyond the clinical context. A section concludes by addressing the importance of the feedback and the neuropsychological assessment report. The second part focuses specifically on stimulation and rehabilitation, offering chapters that target specific skills such as attention, memory, executive functions and academic skills among others. The chapters summarize evidence, bring tips and illustrate existing materials and programs in a continuous articulation between theory, evidence, practice. Originally published in Portuguese and now available in English, *Neuropsychological Interventions for Children* Volumes 1 and 2 will be of interest to professionals working with neuropsychology in clinical and school contexts. It will also be useful in neuropsychology teaching contexts, specialization courses in neuropsychology and related areas and for students and professionals in interface areas such as Psychology, Education, Speech Therapy, Occupational Therapy among others. The translation of the original Portuguese version of this book into English was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.
