Spaces on the Spectrum Catherine Tan, 2024-01-23 Winner 2025 Donald W Light Award for Applied Medical Sociology Medical Sociology Section American Sociological Association Winner 2025 Merton Book Award Science Knowledge and Technology Section American Sociological Association Winner 2024 Sociology of Disability in Society Outstanding Publication Award Disability in Society Section American Sociological Association Movements that take issue with conventional understandings of autism spectrum disorder a developmental disability have become increasingly visible Drawing on more than three years of ethnographic fieldwork and interviews with

participants Catherine Tan investigates two autism focused movements shedding new light on how members contest expert authority Examining their separate struggles to gain legitimacy and represent autistic people she develops a new account of the importance of social movements as spaces for constructing knowledge that aims to challenge dominant frameworks Spaces on the Spectrum examines the autistic rights and alternative biomedical movements which reimagine autism in different and conflicting ways as a difference to be accepted or as a sickness to treat Both however provide a window into how ideas that conflict with dominant beliefs develop take hold and persist The autistic rights movement is composed primarily of autistic adults who contend that autism is a natural human variation not a disorder and advocate for social and cultural inclusion and policy changes The alternative biomedical movement in contrast is dominated by parents and practitioners who believe in the disproven idea that vaccines trigger autism and seek to reverse it with scientifically unsupported treatments Both movements position themselves in opposition to researchers professionals and parents outside their communities Spaces on the Spectrum offers timely insights into the roles of shared identity and communal networks in movements that question scientific and medical authority
