[Pro Web Gadgets for Mobile and Desktop](#) Sterling Udell, 2010-04-06 The miniature web applications known as gadgets or widgets are a key

component of the distributed web and an ideal way to publish your content far beyond the reach of your own web site. Packaging web content and functionality into a gadget enables it to be seen anywhere from iGoogle to the iPhone wherever the user may be on or off the traditional web. Everyone can access your content without having to visit your web site. This book is a practical guide to building gadgets that will work everywhere from handheld devices to any site on the web. The core methodology is to develop a single code base that will run on all platforms multiplying the syndication opportunities for maximum return on your development investment. Extending this approach is a technique of abstracting key API calls from the various gadget platforms into a single interface layer implemented in the book as a compact JavaScript class allowing your gadgets full access to every platform's power without your having to rewrite your code for each. Learn the key concepts for successfully syndicating web content via gadgets. Build platform agnostic gadgets that run on all the major web portals. Deploy your gadgets to web enabled handheld devices. *Perl, CGI, and JavaScript Complete* Sybex Inc, 2000. An unbeatable value 1 000 pages of complete coverage of the key non Microsoft technologies for building interactive Web sites for only 19 99. Includes complete references to Perl commands and modules plus a JavaScript object reference. There's no other book on the market that covers Perl CGI and JavaScript in one volume for this price. **Practical Dojo Projects** Frank

Zammetti, 2008-10-20. The era of professional JavaScript development has arrived. Gone are the days when writing all the client side code for your applications by hand yourself was the norm. Gone are the days when scrounging around the Internet to find a snippet of code to do something you need could lead to either decent code or utter garbage that you'd surely regret using later. No writing high quality JavaScript these days is a whole lot easier with the advent of top notch libraries that save you time and effort and one that stands out from most others is Dojo. Dojo is a library like few others written by some of the best JavaScript coders around today providing nearly everything you'll need to write modern rich Internet applications all in one place. From Ajax to widgets to client side persistence and language extensions and many points in between Dojo has it all. In *Practical Dojo Projects* you'll learn all about what Dojo has to offer. You'll see it in action in the form of five fully functional applications which include: A contact manager for storing info for all the important people in your life. A code cabinet a place to store index and get code snippets from. A stock tracker to keep track of your stock portfolio. A message forum for open discussions on topics you define. Even a fun little game. By the time you've finished reading you'll have a firm grasp on what Dojo is all about and you'll have the preparation you need to begin to use it yourself in your own projects. See you inside.
