Museen Nationalsozialismus Akteure Orte Politik:

Museen im Nationalsozialismus Tanja Baensch, Kristina Kratz-Kessemeier, Dorothee Wimmer, 2016-04-04 Erst vor wenigen Jahren haben Museen in Deutschland begonnen ihre Geschichte während des Nationalsozialismus aufzuarbeiten. Ein bergeordneter Blick auf Funktionsweisen, Entwicklung und Relevanz der Institution Museum im Dritten Reich steht noch aus. Der Band, der die Ergebnisse einer internationalen Tagung der Richard Schöne Gesellschaft für Museumsgeschichte e.V. und des Deutschen Historischen Museums in Berlin im Juni 2013 präsentiert, ermöglicht erstmals eine grundsätzliche Annäherung unter Einbeziehung unterschiedlicher Museumstypen und Kontexte in verschiedenen deutschen Regionen bis in die okkupierten Gebiete hinein. Gefragt wird nach Veränderungen in der Personal Sammlungs Ausstellungs und Vermittlungspolitik, aber auch nach der Organisation und internationalen Rezeption des deutschen Museumswesens in der NS-Zeit. Bewusst facettenreich entsteht so ein neues, vielschichtiges Bild von der Rolle der Museen im Nationalsozialismus zwischen Anpassung und Widerstand, ideologischer Instrumentalisierung und der Suche nach Freiräumen.

Nazi-Era Provenance of Museum Collections Jacques Schuhmacher, 2024-05-23 When we look at the artworks on display in museums, there is always a real possibility that some of these objects once belonged to victims of the Nazis, a possibility that has remained unacknowledged for far too long. Countless artworks were seized or forcibly sold, with many ending up in museum collections around the world, even in countries which actively fought to defeat Nazi Germany. *Nazi-Era Provenance of Museum Collections* equips readers with the knowledge and strategies essential for confronting the shadow of the Nazi past in museum collections. Jacques Schuhmacher provides the vital historical orientation required to understand the Nazis' complex campaign of systematic dispossession and extermination and highlights the current environment in which museum-based Nazi-era provenance research takes place. This book introduces readers to the research methods and resources that can be used to reveal the moving stories behind the objects, highlighting the absorbing work of provenance researchers as it plays out in practice. Provenance research not only seeks to recover erased names and experiences and to reinsert them into a historical record, but also to ensure that the Nazis' actions and worldview do not remain unchallenged in the galleries and storerooms of our museums today. Praise for *Nazi-Era Provenance of Museum Collections* Jacques Schuhmacher has written a hugely powerful, instructive and important book tracing the historic responsibility of the museum world in addressing the legacy of Nazi-era loot. Fluently combining extensive historical scholarship with his expert understanding of investigative tools, this study uses compelling examples of restitution cases to show how provenance research should be done and crucially why it must be done. Dr. Tristram Hunt, Director of the V&A, a timely work drawing upon first-hand experience in Nazi-era provenance research, providing a unique insight into the difficulties thrown up by the period. This book is sure to become a point of reference for those working in the field. His Honour Judge Baumgartner, Deputy Chair, UK Spoliation Advisory Panel. It is crucially important that we continue researching the history of ownership of our museum collections. Only then can historic

wrongs begin to be rectified By providing both a broad overview and individual case studies Schuhmacher offers invaluable guidance on the complexities of Nazi era provenance research Gabriele Finaldi Director of the National Gallery A timely and user friendly addition to the Provenance literature Schuhmacher provides a how to manual complete with website addresses and a much needed clarification of immediate post war restitution efforts A must have for all museum and art world professionals Lynn H Nicholas author of *The Rape of Europa The Fate of Europe's Treasures in the Third Reich and the Second World War* Allowing readers to understand the complex world of Nazi era provenance research this book is both a guide and a moving work of research in its own right Jacques Schuhmacher is uniquely placed to write this book and to further the goal of material restitution Professor Dan Stone Director of the Holocaust Research Institute Royal Holloway University of London This is the place to start for anyone wanting to know about provenance research into looted Nazi era works of art or wanting to do the research themselves Lord Inglewood Chairman of the UK Advisory Group on Spoliation Matters

National-Socialist Archaeology in Europe and its Legacies Martijn Eickhoff, Daniel Modl, Katie Meheux, Erwin Nuijten, 2023-08-14 This edited volume is dedicated to national socialist archaeology as a Europe wide phenomenon It analyses national socialist attempts to denationalize the archaeologies of European nations by creating a new unifying European archaeology on a racial basis From the beginning of the nineteenth century archaeology began to develop into an important force behind processes of nation building At the same time structures of transnational academic collaboration contributed strongly to the internal dynamics of the research field which was primarily organized on a national basis In those European countries that were confronted with national socialist occupation and repression between 1939 and 1945 these transnational archaeological networks were to prove crucial for the development of national socialist archaeological policies This volume will reveal how national socialist archaeology was to an extent valued positively in its time as highly innovative even influencing the archaeology of non occupied countries Although in the final instance it generally failed to displace the national archaeologies in Europe the volume also analyses the long term impact of national socialist rule on the development of European archaeology How did the attempts to create a unified European archaeology after 1945 continue to influence networks methods and terminologies institutional structures or popular representations of the early past Chapter 1 Is available open access under a Creative Commons Attribution 4.0 International License via Springerlink

Staging the Nation in an Intermediate Space Fabio Spirinelli, 2025-06-30 In Luxembourg the evolution of cultural policy remains underexplored despite its pivotal role in the nation building process This book investigates how national cultural policy evolved from the 1920s to the early 1970s casting Luxembourg as a nationalized intermediate space between French and German influences Featuring a case study of the history and art section of the State Museums the precursor to today's Musée national d'archéologie d'histoire et d'art the book examines the interplay of structures actors and discourses and how a cultural institution was intertwined with cultural policy The study exposes the tensions between adopting external models on

the one hand and asserting a distinct national culture amid interventionist policies on the other hand By including the occupation period from 1940 to 1944 it illustrates how Nazi policies challenged Luxembourg's nation building by seeking to integrate it into the Third Reich Combining theoretical analysis with archival research this work offers nuanced insights into nation building processes and is highly relevant for historians cultural policy scholars and museum professionals

Images of the Art Museum Eva-Maria Troelenberg, Melania Savino, 2017-02-06 In recent years the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions To contribute differentiated viewpoints to the currently evolving meta discourse on the museum this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions In this interdisciplinary collection scholars from a variety of academic backgrounds including art history heritage museums studies and architectural history explore a broad range of case studies stretching across the globe The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum including the transformation or adaptation of the image of the art museum across periods and cultures In this context this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale
