## **Musical Beauty Negotiating The Boundary Between Subject And Object:**

**Musical Beauty** Ferdia J. Stone-Davis, 2011-01-01 This book offers an important new perspective on the Western tradition of musical aesthetics through an examination of Anicius Boethius and Immanuel Kant. Within the trajectory illuminated by these two thinkers musical meaning is framed by and formed through the concept of beauty a concept which is shaped by prior understandings about notions of the self and the world. Beauty opens up a space within which the boundary between the self and the world subject and object is negotiated and configured. In doing so either the subject or the object is asserted to the detriment of the other and to the physicality of music. This book asserts that the uniqueness of music's ontology emerges from its basis in sound and embodied practice. It suggests that musical beauty is generated by the mutuality of subject and object arising within the participation that music encourages one which involves an ekstatic mode of attention on the part of the subject.

*Music and Transcendence* Ferdia J. Stone-Davis, 2016-03-03 Music and Transcendence explores the ways in which music relates to transcendence by bringing together the disciplines of musicology philosophy and theology thereby uncovering congruencies between them that have often been obscured. Music has the capacity to take one outside of oneself and place one in relation to that which is other. This other can be conceived in an absolute sense insofar as music can be thought to place the self in relation to a divine other beyond the human frame of existence. However the other can equally well be conceived in an immanent or secular sense as music is a human activity that relates to other cultural practices. Music here places the self in relation to other people and to the world more generally shaping how the world is understood without any reference to a God or gods. The book examines how music has not only played a significant role in many philosophical and theological accounts of the nature of existence and the self but also provides a valuable resource for the creation of meaning on a day to day basis.

**God in Sound and Silence** Danielle Anne Lynch, 2018-06-22 Music by its indeterminate levels of meaning poses a necessary challenge to a theology bound up in words. Its distinctive nature as temporal and embodied allows a unique point of access to theological understanding. Yet music does not exist in a cultural vacuum conveying universal truths but is a part of the complex nature of human lives. This understanding of music as theology stems from a conviction that music is a theological means of knowing knowing something indeterminate yet meaningful. This is an exploration of the means by which music might say something otherwise unsayable and in doing so allow for an encounter with the mystery of God.

**Music and Transcendence** Férdia J. Stone-Davis, 2015

**Contemporary Theological Approaches to Sexuality** Lisa Isherwood, Dirk von der Horst, 2017-08-23 Contemporary Theological Approaches to Sexuality provides a much needed overview of the state of scholarship on Christian theological reflection on sexuality and sexual theology. Critically it also intervenes in the cultural debate over sexuality by privileging feminist queer and other counter normative perspectives. Comprising twenty three chapters by a team of international contributors this volume is divided into four parts Normativity and transgression Bodies Economies and violence Divinity

Within these sections central issues debates and problems are examined including consideration of the complexities of Christian theology in regard to contemporary sexuality debates Contemporary Theological Approaches to Sexuality is essential reading for students and researchers in the field of religion sexuality and Christianity *Philosophy of Music Education Review*, 2013 **Music and Transcendence** Ferdia J. Stone-Davis, 2016-03-03 Music and Transcendence explores the ways in which music relates to transcendence by bringing together the disciplines of musicology philosophy and theology thereby uncovering congruencies between them that have often been obscured Music has the capacity to take one outside of oneself and place one in relation to that which is other This other can be conceived in an absolute sense insofar as music can be thought to place the self in relation to a divine other beyond the human frame of existence However the other can equally well be conceived in an immanent or secular sense as music is a human activity that relates to other cultural practices Music here places the self in relation to other people and to the world more generally shaping how the world is understood without any reference to a God or gods The book examines how music has not only played a significant role in many philosophical and theological accounts of the nature of existence and the self but also provides a valuable resource for the creation of meaning on a day to day basis
