methods with the help of interval arithmetic in particular for the numerical solution of differential equations      **The Publishers' Trade List Annual** ,1886      *Books in Print Supplement* ,1985      **Parallel Computing 85** Manfred Feilmeier, Gerhard Robert Joubert, Udo Schendel, 1986 Proceedings Parallel Computing      *Computer Algebra in Scientific Computing CASC'99* Victor G. Ganzha, Ernst W. Mayr, 1999-05-31 The development of powerful computer algebra systems has considerably extended the scope of problems of scientific computing which can now be solved successfully with the aid of computers. However as the field of applications of computer algebra in scientific computing becomes broader and more complex there is a danger of separation between theory systems and applications. For this reason we felt the need to bring together the researchers who now apply the tools of computer algebra for the solution of problems in scientific computing in order to foster new and closer interactions. CASC'99 is the second conference devoted to applications of computer algebra in scientific computing. The first conference in this sequence CASC'98 was held 20-24 April 1998 in St Petersburg Russia. This volume contains revised versions of the papers submitted by the participants and accepted by the program committee after a thorough reviewing process. The collection of papers included in the proceedings covers various topics of computer algebra methods, algorithms and software applied to scientific computing, symbolic numeric analysis and solving differential equations, efficient computations with polynomials, groups, matrices and other related objects, special purpose programming environments, application to physics, mechanics, optics and to other areas. In particular a significant group of papers deals with applications of computer algebra methods for the solution of current problems in group theory which mostly arise in mathematical physics.
