Evangelicals Travis Warren Cooper locates evangelicalism as a media event rather than as a coherent religious tradition by focusing on the intertwined narratives of evangelical Christianity and emerging digital culture in the United States. He focuses on two dominant media traditions: media sincerity (immediate and direct interpersonal communication) and media promiscuity (communication with the primary goal of extending the Christian community regardless of physical distance). Cooper, whose work is informed by ethnographic fieldwork, traces these conflicting paradigms from the Protestant Reformation through the rise of the digital and argues that the tension is culminating in a crisis of evangelical authority. What counts as authentic interaction? Who has authority over the circulation of information? While many studies claim that technology influences religion, *The Digital Evangelicals* reveals how Protestant metaphors and discourses shaped the emergence of the internet and explores what this relationship with global new media means for evangelicalism.

**The Digital Is Kid Stuff** Josef Nguyen, 2021-12-28 How popular debates about the so-called digital generation mediate anxieties about labor and life in twenty-first century America. *The Children are Our Future* goes the adage, a proclamation that simultaneously declares both anxiety as well as hope about youth as the next generation. In *The Digital Is Kid Stuff*, Josef Nguyen interrogates this ambivalence within discussions about today's digital generation and the future of creativity, an ambivalence that toggles between the techno-pessimism that warns against the harm to children of too much screen time and a techno-utopianism that foresees these digital natives leading the way to innovation, economic growth, increased democratization, and national prosperity. Nguyen engages cultural histories of childhood, youth, and creativity through chapters that are each anchored to a particular digital media object or practice. Nguyen narrates the developmental arc of a future creative laborer from a young kid playing the island fictions of *Minecraft* to an older child learning do-it-yourself skills while reading *Make* magazine to a teenager posting selfies on Instagram to a young adult creative laborer imagining technological innovations using design fiction. Focusing on the constructions and valorizations of creativity, entrepreneurialism, and technological savvy, Nguyen argues that contemporary culture operates to assuage profound anxieties about and to defuse valid critiques of both emerging digital technologies and the precarity of employment for creative laborers in twenty-first century neoliberal America.
